PREFACE

This Progress report summarizes BAASS activities and progress for the period November 1- November 30, 2009.

TABLE OF CONTENTS

Topics covered in this report are the following:

Summary of MUFON Investigative Activity for November 2009.....Page 3

Progress on Utah Ranch Investigations.....Page 59

Preliminary Report on a Blue Orb Incident.....Page 126

Conclusion.....Page 154

Summary of Cases That MUFON Investigated During November 2009

In February 2009, BAASS executed a Purchase order with MUFON that entitles BAASS to: (a) receive notification of significant reports on UAP sightings from anywhere in the United States within hours, (b) receive timely reports from MUFON investigators regarding investigations of these incidents (c) receive physical evidence (including photographs, digital recordings, samples of soil, insects, plants, and animals) for scientific analysis. BAASS has multiple laboratories that are ready to conduct forensic, photographic, metallurgic, chemical, isotope, biological, chemical analysis of any specimens that BAASS receives from MUFON.

It should be noted that during the month of October 2009, BAASS conducted an appraisal of MUFON's performance to date. BAASS was dissatisfied with MUFON's tendency to warehouse significant sums of money every month, especially during the early stages of the contract. Hence, for the remainder of the contract, BAASS will be reducing the monthly stipend to MUFON by $10,000. This will still enable MUFON to operate at normal efficiencies as they spend down the remaining surplus money.

The following are selected investigative reports from MUFON deployments during the months of October 2009.

Case Report MUFON SIP Deployment

Case # 19865 **Case Type: Cat 2**

Investigator: AAP Person 116

GPS COORDINATES : 1843(a)(3)

COORDINATES ACCURACY: Location of witness vehicle on highway where sighting occurred. Object was seen 30-50 feet to the East at approx. 25' altitude.

LOCATION: Railroad crossing on 1843(a)(3) **Modesto, CA**

DATE OF EVENT: 10-07-09

TIME OF EVENT:20:04:00 ( ) Exact (x) Approximate

On 10-13-09 a CAT 3 Star team Deployment in Modesto, CA was authorized and AAP Person 116 **was assigned as lead investigator.**

AAP Person 59

MUFON (Mutual UFO Network)
STAR Team Manager
SIP Project Coordinator

Background:

Two witnesses (father and 6 yr. old daughter) in a rural area first observed and photographed two blue elevated lights in flight approximately a mile away towards town. Witness drove towards objects for better view. Upon arriving at general site, objects converged in flight upon witnesses from left and right to a hovering position viewed from front auto window. Frightened by the event and belief that objects began following them, witness drove rapidly one half mile into town and a mile beyond where objects were no longer observed. Daughter developed a chest rash the nest day.

Narrative:

Thursday 10/15/09 17:50

Drove to Modesto, CA and arrived 19:07 at California Highway Patrol at 4030 Kiernan Ave., only to find the office closed.

Drove the route that reporting witness took on the night of his sighting to familiarize myself with surroundings, abstractions, lighting, traffic, and details included in his report.

Drove to the church and waited until 20:00 when witness came out of the church. As soon as we met and made introductions, witness offered to show me his route and stops for different events.

We drove south on Tully Road and stopped midway between Kiernan Ave and Bangs Ave where witness took his 3 photos of the 2 blue lights with his cell phone looking southeast. (We later discovered the location of the 2 blue lights were very close to the vicinity of the Modesto Hobby and Crafts Store on Bangs Avenue east of Tully Road approximately 3000 feet away from witness's camera shots.)

We then drove east on Bangs Avenue and stopped on the east side of the railroad tracks where witness stated, "...my vehicle was converged on from the fields from the north and south just before the auto dealership on my right. I could see them from my front window approximately thirty to fifty feet (away) with one being above the other" 1843(a)(3)

1843(a)(3)

We soon discovered the Modesto Hobby and Crafts Store was on Bangs Avenue approximately 800 feet from the railroad crossing between the tracks and the auto dealership. Hobby store was closed.

We continued to travel east on Bangs Avenue past the Modesto Hobby and Crafts Store and auto dealership to the stoplight on McHenry Avenue where we turned right and drove two blocks through Pelandale Avenue where witness's daughter had stated, "Daddy, it is following us". From this location, an illuminated aerial object above the railroad crossing could still be in view at approximately 4400 feet away.

We drove one block farther south on McHenry to approach the next stoplight at E. Union Avenue where, on the night of this event, a police car was parked and many workers had been repaving the road. When witness's daughter was asked if she still saw it, she said, "Yes". It is questionable if these other people had also

seen these blue lights although approximately 6000 feet from the railroad crossing.

By the time we drove another block (~ 1200 feet) south on McHenry Avenue to Standiford Avenue, witness's daughter had said, "It went away". (Total distance from railroad crossing ~7200 feet)

I didn't see any rash on witness's daughter's chest. ***** will send me a picture of it. The origin of the rash is unknown, perhaps stress.**

I did not find any knowledgeable person at the Boyett Gas Service Station in the vicinity to interview.

Witness was leaning towards the hobby shop model remote controlled airplane hoax scenario through discussion with friends. Because of this inclination, witness does not want to talk to BAASS or any other third party. I have good working communications now through witness for networking in the Modesto area and I expect to hear from him as he explores his suspicions further with his personal friends and hobby store.

AAP Person 116

MUFON Star Team Investigator

With new info from ***** below, I listed identity of objects in CMS Report as: IFO-Man-Made Objects.**

Subject: Investigator notes - reevaluating CMS 19865?

October 29. 2009

AAP Person 103 **Hi** [redacted]

I read your report - I concur with Investigators assessment that daughter of witness possibly may have suffered a rash due to stress (frightened).

However, perhaps from experience, something did not seem right.

I noticed you mentioned a local hobby store in your report. I used to fly RC model planes and thought to check to see if model aircraft were flying the night and location of sighting. Maneuvers of objects in witness report suggested lights could be model planes.

After reading investigator report, I contacted [redacted] **who answered store phone -** 1843(a)(2) **an employee of 'Modesto Hobby and Crafts' - 401 Bangs AVE #H Modesto Ca (209)529-7310**

Often local hobby shops are a invaluable source of information on local model flying clubs as well.

This store is very near location model flying location of the UFO sighting reported in CMS 19865.

http://www.modestohobby.com/

Contacting Store nearby location of sighting....******* confirmed a number of hobbyists' fly their model gliders at night or early often most evenings. ******* also confirmed they all use bright blue colored lights on their gliders to see their models. These models are unpowered gliders (perhaps 'slope gliders'?)

******* also confirmed they were flying models matching the maneuvers also - the same night and time of UFO sighting October 7,, 2009 (20:00 hours PDT). ******* also commented that they get many UFO reports from cars passing in area according to Modesto Police Dept.. The Modesto Police Dept has sometimes shown up at model air field in response to a UFO report phoned into Modesto police according to employee *******.

Based on this new new information, before approving case - recommend investigator consider reevaluation of case deposition from 'Unknown' to 'IFO: Man Made Object' (RC model gliders with blue lights attached.)?

Most Respectfully,

AAP Person 117

Chief Investigator

STAR Team Manager
SIP Project Coordinator

Background: ******: witness goes by********

The witness ******* saw a large craft land in the woods through his bedroom window at approximately 1:30 AM the morning of Oct. 25, 2009. He and his wife watched it through the window for between 15 and 30 minutes before he decided to go outside for a better view. When ******* went outside he noticed that there were also several small objects much closer, low in the woods. He went into the house, woke his eleven year old son, grabbed binoculars and they both went outside to get a closer look. The two of them saw the large craft deep in the woods which was an upright triangle shape with several different color lights; silver, green, blue, orange, and red all flashing. In the woods much lower, were three "saucer" shaped orange/red lights which were in a field to the west. Two of these were in the woods below the far neighbors dusk to dawns and the third even lower being seen by ******* and his son while on their knees on the back deck of their home. Farther to the left of their deck (west), they spotted 3 more orange/red lights in the woods and a little farther to the left one blue light that briefly flashed for a total of seven lights, not counting the craft. These light were small and spinning and so bright that they were visible even without the binoculars. After about an hour, the lights changed from saucer shaped to round and began spinning in a different manor. They were now the shape and size of a soccer ball having compressed but not more than half their original size. The lights still proceeded to flash orange/red brighter and dimmer and move slowly about the woods as they spun. The large craft stayed stationary. This was all in the woods behind the family's home the craft being directly north and the lights being south/west of the craft. After hiking with ******* through the woods and finding the spot, we determined by using my range finder that the large craft had landed .7 miles behind *******'s house in the direction directly north.

After an hour or so of viewing the craft and the lights, ******* noticed a figure of what he thought was a person standing on the ridge behind the house much closer than the craft or lights. (He noticed this because a deer ran close by across the woods in front of him snorting.) The being was determined to be about five feet tall and wearing something horizontally striped, that was black and white and loose fitting like a down jacket. The being was holding something in his/its left hand and had it up to its mouth like he was talking into it. There was also what looked like a back-pack placed on the ground in front of the being at its feet. ******* described the figure's face and hands as being white in color. He was looking through binoculars and wasn't sure if it was skin he was seeing or some type of mask. After measuring the area and viewing the video tape that I took of the area, we determined the being to be standing about 50 yards from the back of

their home. I asked ******* what he did when he saw the being, and he said that he told his son to run in the house which his son did. ******* said that he stared at the being through binoculars for several minutes seeming to be "staring each other out". I asked him when, why, and how did this end. The reply was that he got tired and decided to go inside the house. ******* then described watching the craft through the bedroom window falling asleep and re-awaking to watch periodically until about 5:30AM when he woke to check for the last time and the craft was gone. He thought that he was only asleep for about 15-20 minutes but missed the craft leaving the woods.

Investigation Report:

Wednesday, October 28, 2009 3:30PM

AAP Person 118 Missouri MUFON Assistant State Director, who was assisting me on this case, interviewed the other witnesses who were *******'s wife, and two sons. I hiked into the wood with ******* in an attempt to find some trace evidence of the landing sight. The sight was due north .7 miles from the back of *******'s home as we determined later with my range finder. We walked through the woods to a ridge which we suspected to be where the being was standing the night of the sighting. We came to this conclusion because this was the only place in the area in question where the being would be visible as close as he/it was seen from the back deck of *******'s home. This area was about 50 yards away. When we reached this ridge, I noticed a chipmunk on a small tree and a few feet away a turtle. Both were alive and very close to where the being stood. *******'s dog [redacted] who we took with us to determine if there was any animal reaction, sat in this spot with no remorse. But, when we hiked down the ridge she refused to follow. [redacted] made her way west staying on the ridge but watching us cross the woods. We hiked down through rough terrain, up another ridge, across a small creek, and across more rough terrain. Even though this area was fairly flat with some trees down, ******* determined that this couldn't be the spot because he couldn't see his house. We made our way up another ridge and down, across a barbed wire fence, up and over another ridge to another flat area deep in the woods. From this point we could see the back of *******'s home through binoculars and he determined that this was the right distance away into the woods. We hiked around carefully not disturbing any possible foot prints, tracts, etc. I notice an area with small bare spots but this was as obvious wash off from a ridge farther north. Further to the west of this area I noticed

1843(a)(2)

1843(a)(2)

broken trees. Some were old breaks but several were new broken limbs and small uprooted trees. I also came across an uncharacteristic bare area which I measured to be 6 foot 6 inches, by 7 foot 6 inches square. There were heavy leaves covering the entire area except for this one spot which was bare except for a few leaves which had blown over it. I took a reading with my Geiger counter and EMF meter but nothing registered. To the north edge of this bare area I could see pushed over dirt like it was cleanly scraped from the surface taking all the grass and leaves with it. The dirt area left wasn't dug in where I could make a mold, but seemed to me to be raised a bit over the rest of the area terrain. I collected a dirt sample from the center of this area, and a sample from the area that was pushed up. I also took a compass reading of the area as reference noticing that was my compass was off. I lined myself up to the house directly as I had done before we left and it read 40 degrees off to the east instead of due north as it should have. I walked east about thirty feet and took another reading which was 20 degrees off to the east, then back to the spot which again was 40 degrees off. I teach underwater navigation so I know how to use a compass and this was definitely off. The compass read 40 degrees off even when I walked thirty feet to the west of the patch of dirt which I will assume at this point could be the possible landing sight. Around this area (in about a 25 foot ratio) were small raised areas in the ground as well. These ranged from football size to twice that size. These areas looked like mole mounds but much bigger. Most of them were raised up with brown dirt, but two of them had a strange orangish clay color. I took dirt samples of these as well.

Another strange effect was *******'s dog [redacted] First she sat where the 1843(a)(2)
unidentified being stood, next she refused to cross the terrain with ******* and me but made her way around to the west of us, and finally her last reaction to the area. ******* had been carrying my Star Team bag for me. (He was a real gentleman and insisted). When he lay the bag down on sight, I eventually moved it close to the bare spot I was documenting. [redacted] came over to it and lay down 1843(a)(2)
next to the bag not budging until we left the sight. The bag had *******'s scent on it and it seemed like she was using it as a safe place.

After documenting the possible craft landing sight, we traveled southwest towards the areas where the balls of light were seen. About 75 feet from the primary sight I spotted two mysteries holes. They were side by side, and exactly 1 foot 6 inches apart. These holes were around 10 inches deep with a narrow hole-area at an angle at the bottom. At first I thought they were snake holes, so I cleared off the leaves and noticed that the hole at the bottom ended. These two

matching holes were 1 ft 4 in. X 1 ft 4 in. round at the top each being the same. I took pictures as documentation. At this time we were at about 5:30PM and loosing light. We still had two more sights to get to before dark and several inches of rain moving in the next day so we moved on.

******* took me to another sight which was a large grassy area. This is where he suspected that three of the balls of light were. All we saw were horse shoe tracts, deer tracks and dung. We hiked to the next area where we were met with an electric fence. This is where he saw the other three orange/red balls of light and the one brief blue one. At the far end of the field we noticed another square bare area. I took pictures and video for reference. Upon viewing the video I noticed that this area was nothing like the sight found before, but an area where the rancher places hay for his horses/cattle.

The area in question we covered was a minimum ½ mile wide, and .7 miles from the witness's home. Because of this, no out of area dirt samples were possible.

******* also told me about an occurrence on Monday night Oct. 26, 2009 at about 1:30 AM (technically Oct. 27th.) ******* was out watching the night sky, for obvious reasons, when he saw 2 military jets flying grids across the sky. He watched them from 1:30 AM to 2:30/3:00 AM. They were flying search pattern grids and dropped 3 flares lighting the sky. He said that the flares were dropped at different times to keep the sky lit. Because of the fog that night the sky/woods seemed to almost glow blue with the orange flares. ******* told me that if they were searching for the craft they were searching too far southwest.

**********: Interview 6:30 to 7:00 PM Oct. 28, 2009**

AAP Person 118 [redacted] was able to recover ******* and I via cell phone contact ½ mile away west of *******'s house. (We got lost a bit) I took the opportunity to interview *******'s neighbor on the way back.

*******is *******'s neighbor who is located about 10 acres to the west of *******. On the night of Oct. 26, 2009 ******* noticed 4 F-111 jets out of Whiteman Air Field going about 80 knots and running cross-stagger grids. ******* has a good description of the activity because he was a Marine Air-Wing for seven years. He remembers that it was just before his wife came home from work at 11:00 PM. Prior to this he witnessed 2 military helicopters circling the area for just a few minutes. He described the grids as being close proximity with

low slow flight. He only watched them for a few minutes but heard them for quite some time. I asked him if this was usual activity and he said that he had only seen this one time before about 8 months ago. He has seen military maneuvers practiced over head but the last was during the day 3 months prior with dog-fight activity and flying high altitude. Whiteman Air Field is about an hour drive away but just a few minutes fly time by jet. ******* didn't see the jets drop flares or the helicopter shine a search light. If these were in fact military helicopters, their night vision/heat sensors would rule out the need for a search light.

******* hadn't seen any strange lights in the past few weeks or prior, but had heard deer running and snorting late night over the past few days. One of his dogs has also been bedding down close to a tree starting at dusk the last few nights and not moving until dawn. He said that the dog was fine during the day, not sickly, eating as usual, but strangely skittish at night.

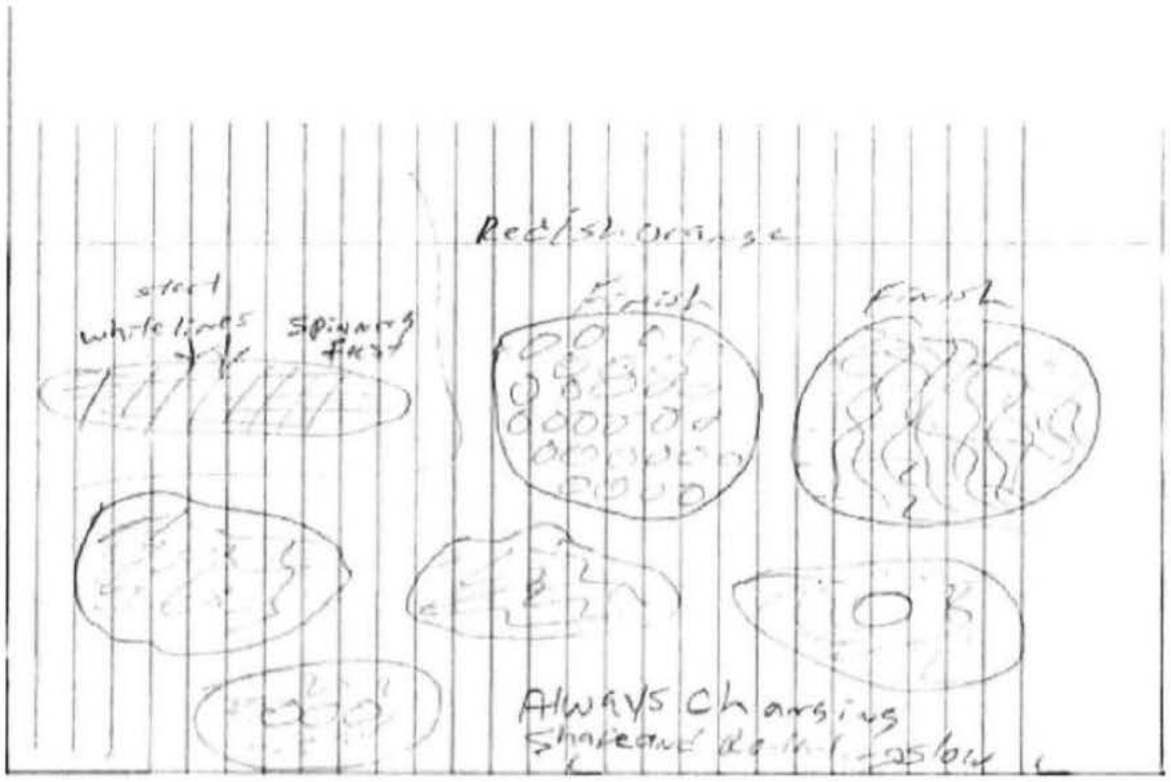

AAP Person 118 [redacted] ******* and I got back to *******'s house just about dark. Before we could get set up for night observing of the area we had a strange light appear in

AAP Person 118 the northern sky. [redacted] got a few still shots and I got some night vision video. The light remained stationary for several minutes then seemed to slowly set in the northern sky, shifting east a few degrees, then disappearing and reappearing more to the west. Terrestrial activity rises in the east and sets in the west. Stars don't set in the north, shifting position in the sky or disappearing and reappearing. This went on for more than an hour. We also had other strange streaks and balls of light cross the northern sky and my night vision picked up a couple of strange effects including one wide white streak. Further analysis of our video and still pictures is pending.

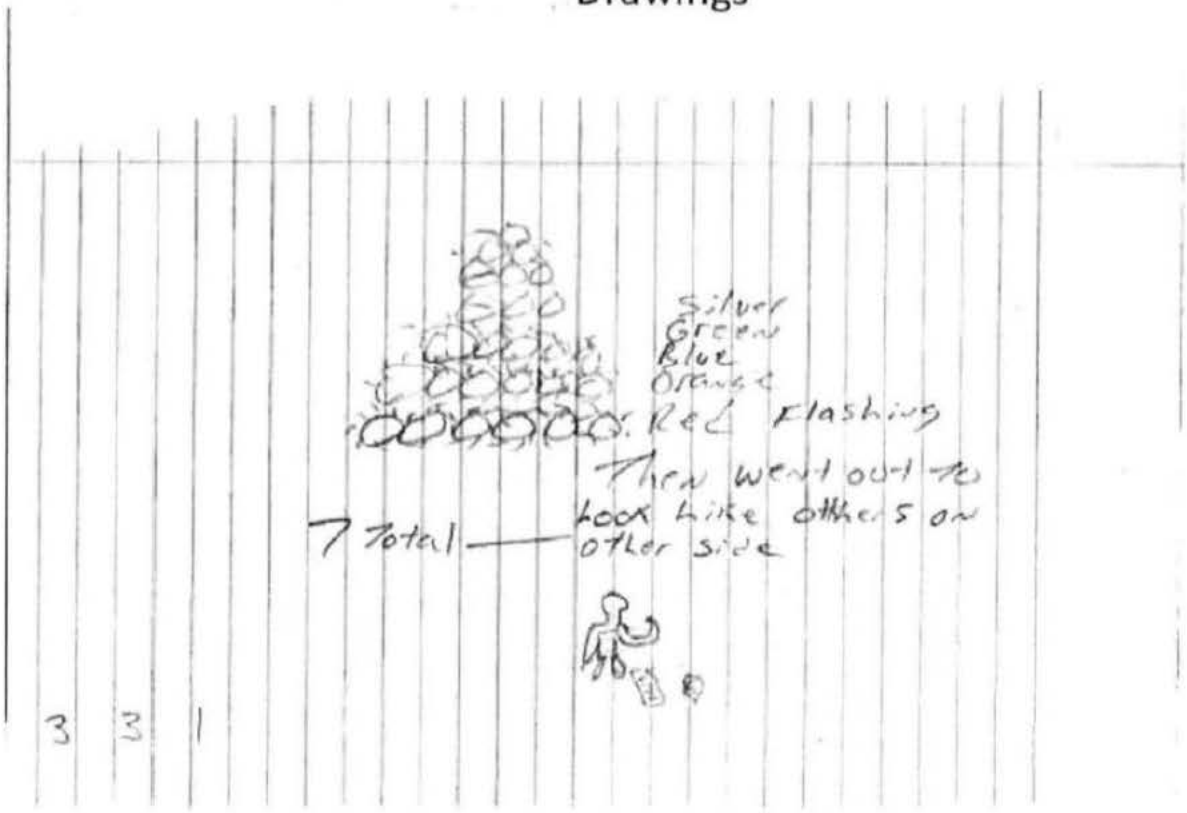

NOTE: Lake of the Ozarks is only 10 miles south of this location.

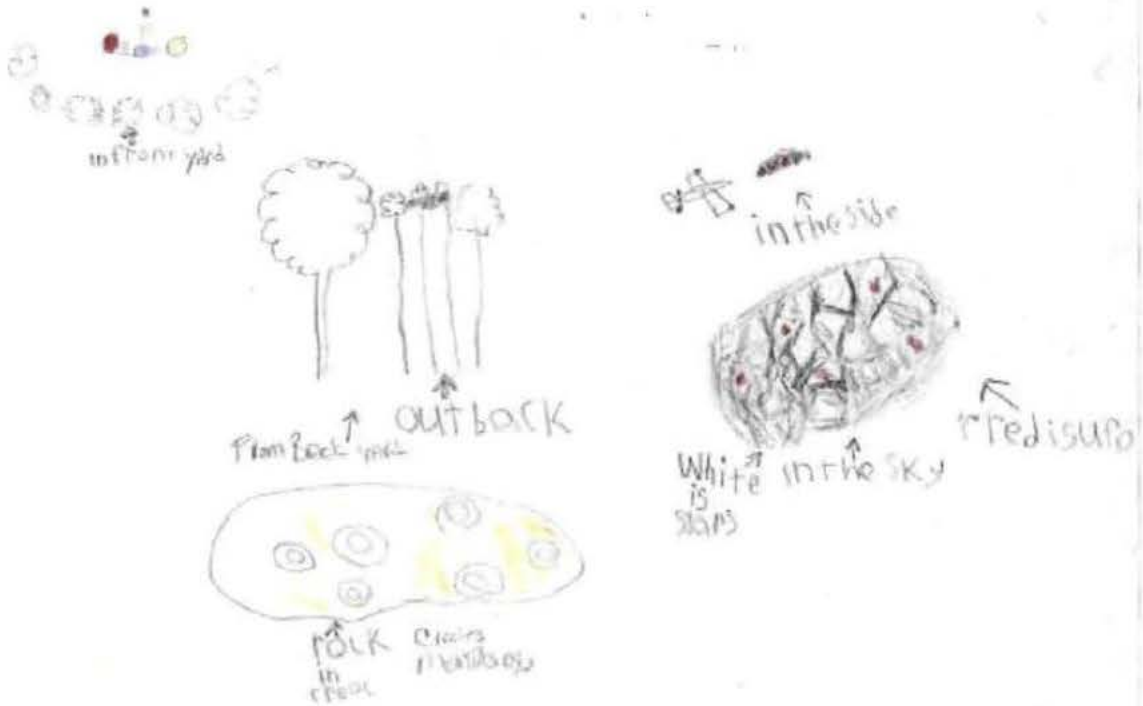

Conclusion: Unknown UAV, Entity, and Landing Sight. CAT. 3

AAP Person 59

MUFON (Mutual UFO Network)
STAR Team Manager
SIP Project Coordinator

BACKGROUND: Many central Texas residents were witness to a sudden light show by an object, or objects unknown. Over a period of nearly 1 hr and 5 minutes, extremely high-intensity lights came on, off, and on for a second or two and then went off. These lights seem to be in a straight line with the whole light array moving to another location close by and coming on again. The earliest sighting was 19:00 with the latest reported 20:05. Other witnesses said there were 4 smaller lights with the larger lights. These numbered anywhere from 0-4.

INVESTIGATOR NARRATIVE: Witness comments in black and investigator comments in red-

20595 – Santo

At approximately 19:33, 2 miles west of Santo TX, I was in the process of feeding my dogs when I noticed out of the corner of eye a (flash) bright light. I stopped to look (190* SSW) and the bright light began to dim, then immediately a second light illuminated for one second, then a third for one second and then a fourth. After the fourth illumination, I saw 4 tiny white dots moving very slowly across the sky and within a second or two all the lights disappeared. They reappeared in almost the same area, in the same pattern and it happened again for a total of 3 cycles.

They were approximately 200ft AGL, 2 miles from our home. The Interstate is a mile from home and the sighting about a mile further on. These lights were very slow moving. Using the I-20 hwy as comparison of 70-75 MPH, these lights were going about 30 MPH heading ESE. At junction of FM 4, objects turned more to SSE. (there is another witness according to this witness who also saw the object at this time).The colors were a white (yellowish orange) that seem to change colors and almost flicker.

I cannot help but see some controlling factor in these actions. The difference here seems to be a flicker ing of the lights and 4 lights. Witness is a pilot, works for 1843(a)(2) gave extremely accurate descriptions and was the best witness.

Witness said all the lights were a bright white, but his wife said they were more orangy. Witness indicated that trucks on the Interstate are app 4" long to his sight, and this object was 10-12" long. He estimated that the object was approximately 200' long. There may be others calls on this generated by his friend and co-workers.

This witness said when the lights would come on, they were like explosions. No sound, just a bright flash as they came on. Witness also indicated that he did not here any jets at that time or later.

1843(a)(2)

Figure 1 (20595) Graphic by witness in Santo

1843(a)(3)

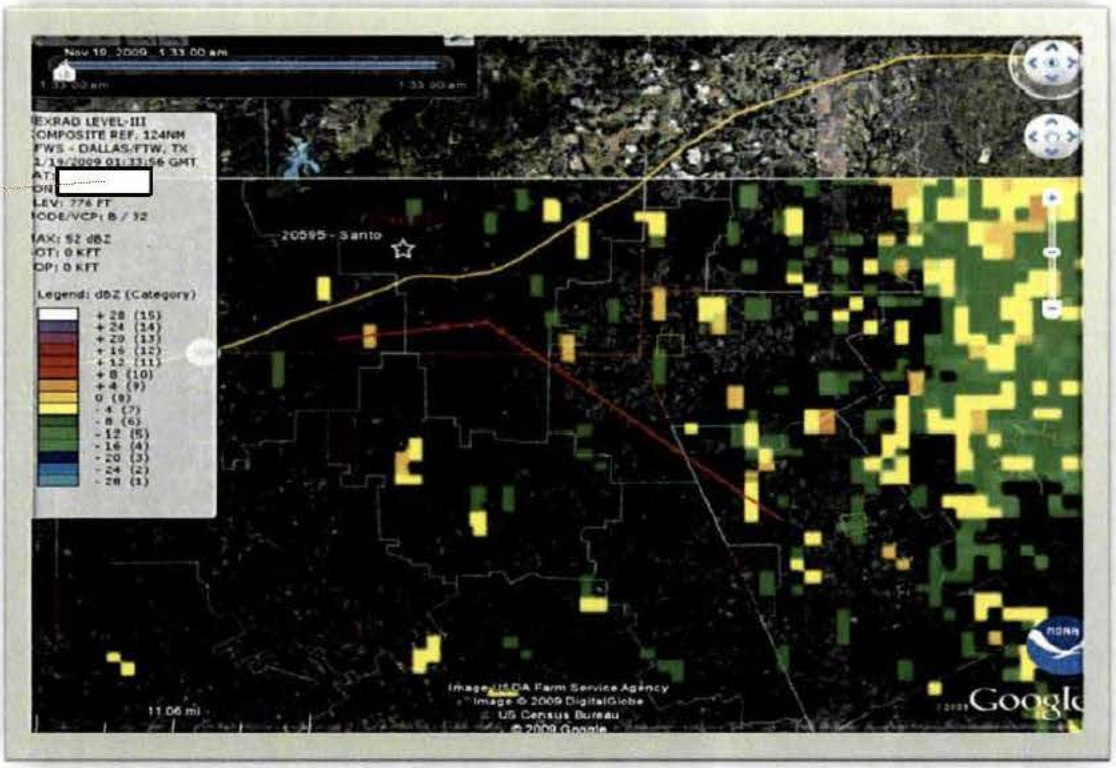

Figure 2 (20595) Orange block indicates an object at the place of the Santo sighting

20598 – Stephenville

I was driving home from my in-laws house who live in the Greens creek area between Stephenville and Dublin but more near Dublin with my four year old and 12 week old in the car with me. It was not long after I turned off of County Road 242 which I had been heading north, on to another county road, I believe it is County Road 381 heading south east. It was not long after I turned onto County Road 381 that I noticed two bright lights in the sky.

Out of the view from my windshield the light to my left was slightly higher. My initial reaction was that they were planets, they were orangish in color and they were larger than star. I slowed down and leaned forward in my seat to investigate what I was seeing. I soon realize they were far too large to be planets almost as soon as I came to this realization a another light appeared above and to the left of the light on my right and then another light appeared above the new light and to its left forming a straight line at about a 45-60 degree angle.

The lights were stationary in the sky never moving. As the new lights appeared I started freaking out. As you well know UFO sightings are prevalent in our area and I could not believe that I could be possibly witnessing it for myself. Probably a second after the new lights appeared they faded beginning with the first light on my left and then they were all completely gone. Once the lights on the left started to show up I did not pay as much attention to the light on the far right.

I do not believe it changed but do not recall when for sure it faded although I know it was within seconds of the other lights. In all the event took place in probably less than 2 minutes. The thought of the UFO sightings did not occurred to me as the third and fourth light appeared but it was really the manner that the lights faded that convinced me that I had just witnessed something strange.

I was very excited and shocked about what I had just seen and got on the phone to share it with my husband immediately. My outgoing call to him was at 7:44 P.M. Therefore I approximate the sighting took place at 7:42 P.M. I just received word via Facebook that a friend of mine also witnessed lights in the sky this evening although I do not know the specifics of their sighting.

According to the Clark Field Municipal Airfield Manager, another man had told him of 3 helicopters off hwy 377 between Dublin and Stephenville in a triangulation and range finding exercise a week or two before the 25th.

This area does correspond to the location of some of the sightings. With the dates of the sightings being on the 18th, that lands exactly 1 week to the day of the sightings. He indicated that the high-intensity lights were not orange, but white. Red and green navigation lights were also visible. This does not agree with a few other witnesses, but they may have been too far from them to see navigation lights

. I will make note of the fact here that aircraft do not have to run with lights while in the Brownwood MOA's. Of note, Clark field has no radios and no radar. Consideration was given to the possibility of the Helicopters coming from Ft. Hood, Dyess or Carswell

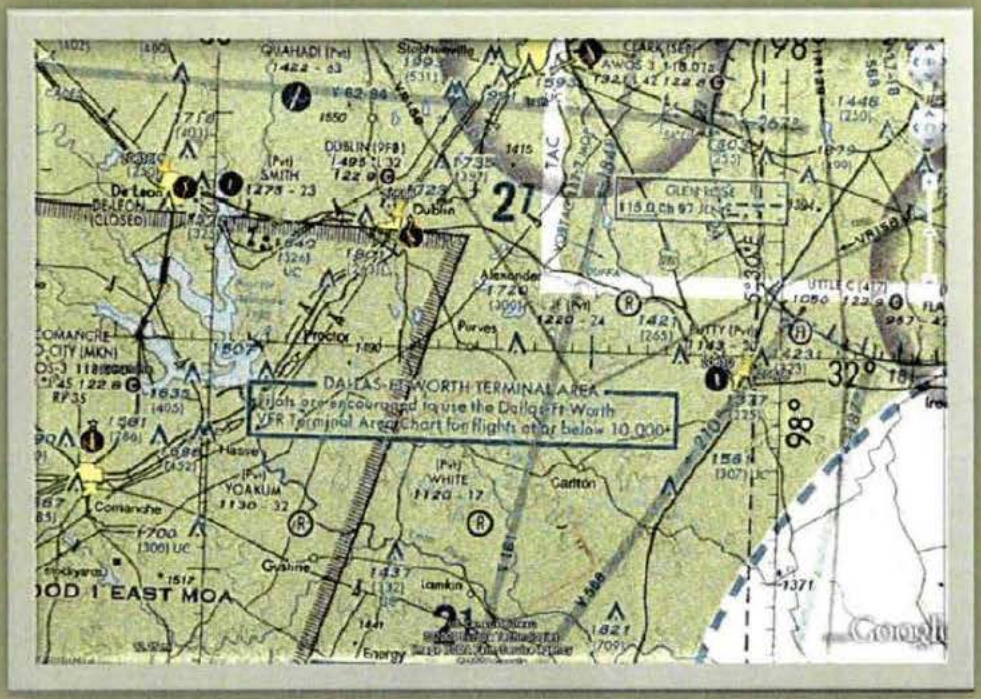

Figure 3 Brownwood 1 East MOA is over most of the sighting area and close to the rest. It might be noted that flight routes and power transmission lines are in the area.

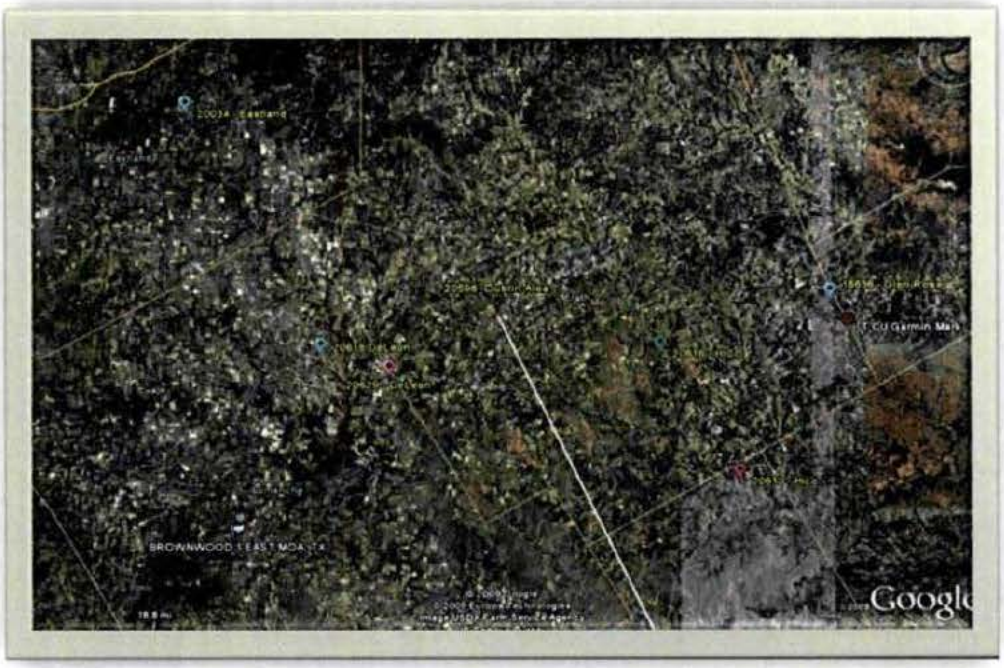

Figure 4 (20598) sighting line was judged to be 156 degrees by measurement.

1843(a)(3)

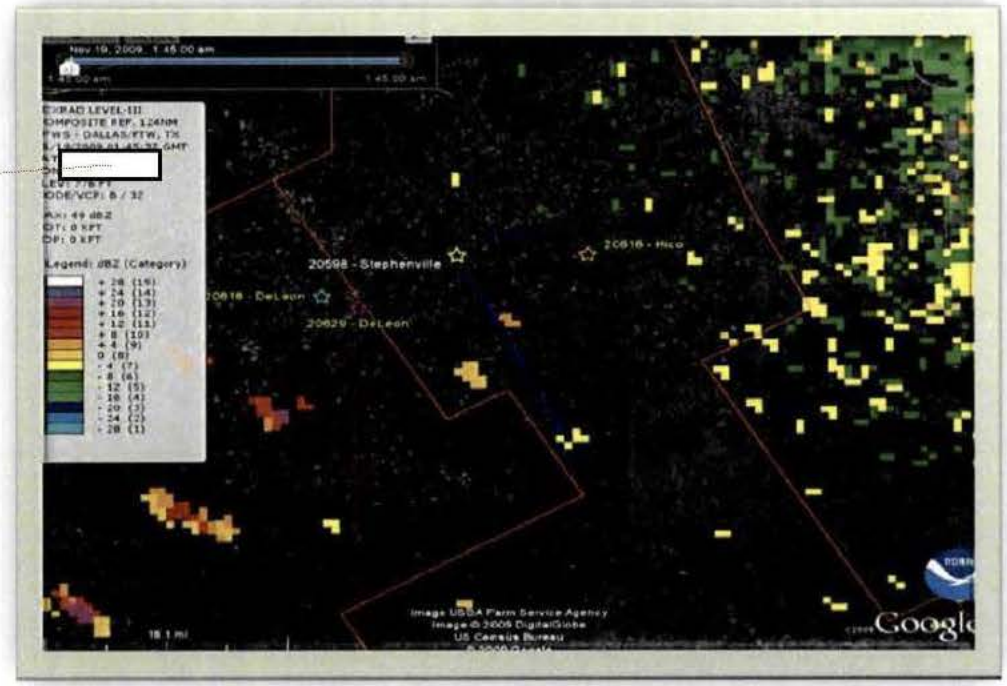

Figure 5 (20598) Line of sight intersects with one yellow target on the timeline and is very close to an orange target at 01:45:32 (GMT 19th)

On a radar image out of DFW, (Figure 6) given the distance, the orange image below the blue sighting line indicates that this object was between 4000 and 6000 ft above ground. Hard targets in red-orange west were in Brown county headed east at or above 10000 ft.

To be that far away and that high eliminates most, if not all ground clutter, birds, bugs, etc. The large yellow target also indicates a solid target. It is also important to realize that the call to witness's husband was made at 7:44 pm and she guessed the time of sighting at 7:42 pm. I believe this all falls within the times of the radar image. Video of the radar sighting every 10 minutes showed that the traffic in the lower left of Figure6, (red and orange) was moving in an eastward direction. Additional radar searching is needed to finish this.

1843(a)(3)

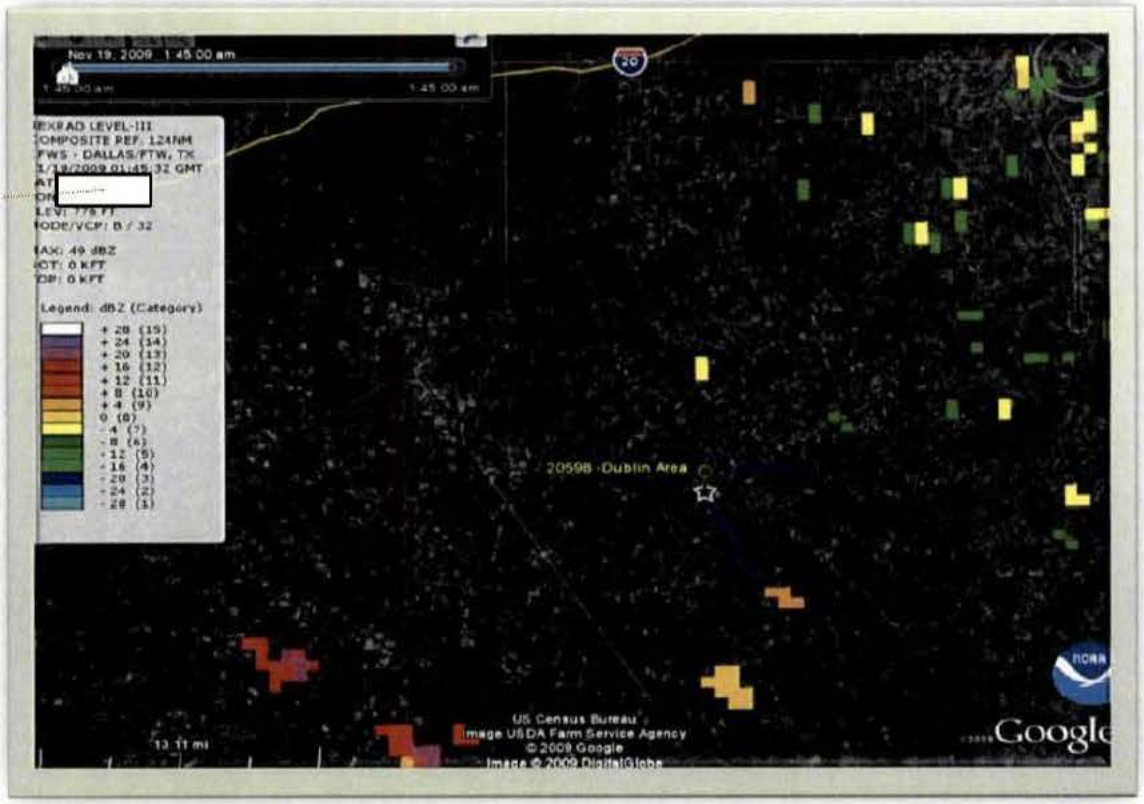

Figure 6 (20598) Radar image out of Ft. Worth at 01:45:32 (GMT 19th)

20610 – Hico

AAP Person 120

Report was taken by Mufon Dispatch [redacted]

3 - 6 lights in a straight line flashing, objects were a long distance away the size of this was monstrous, if lights were connected tone object this is true.

Witness was off highway 6, Between Rising Star and Comanche

The lights were very bright orange,

jets were chasing objects and a lot smaller than this object,

viewed for 45 sec to a minute.

a friend saw the object in Abilene, 30 min prior to this sighting

7 witnesses in Stephenville ,

A friend who is a police officer has a dashboard video (dashboard video is of the 2008 sightings) but does not in anyway what his name used.

Witness has pictures and video and can get pictures and videos from other witnesses. Investigator has seen photos and is trying to get copies. Witness also reported that there were 4 jets in the area some minutes after the sighting. He indicated that he was in a large pickup that night and it seemed very small in comparison to that extremely large object. These distance-judging episodes at night are notoriously hard to accurately portray.

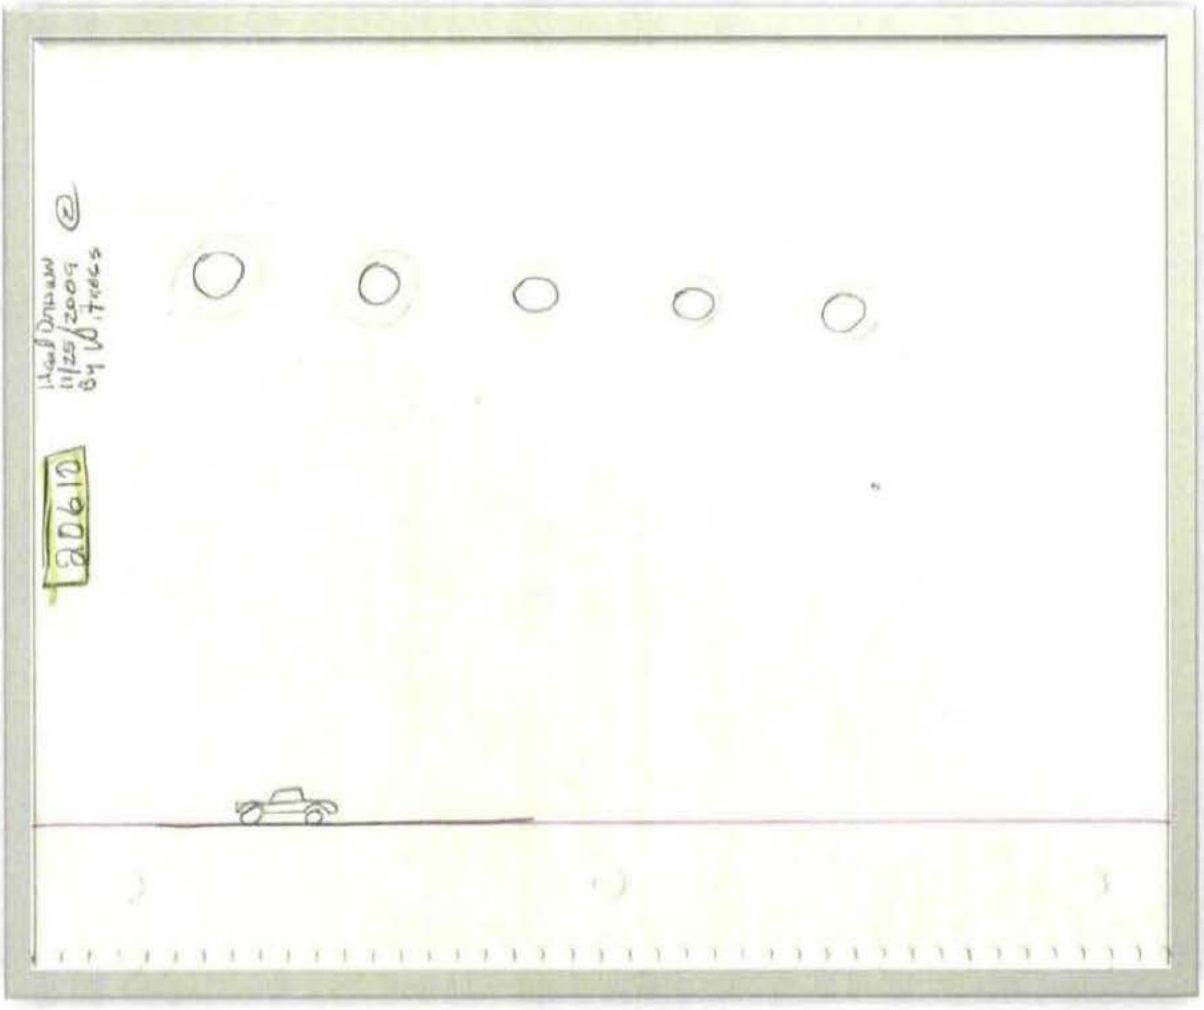

Figure 7 (20610) Hand drawing provided by witness. Witness indicated that he thought there were darker areas between the lights signifying an extremely large object. I think unlighted area next to lights would look that way at night. No proof here of an object.

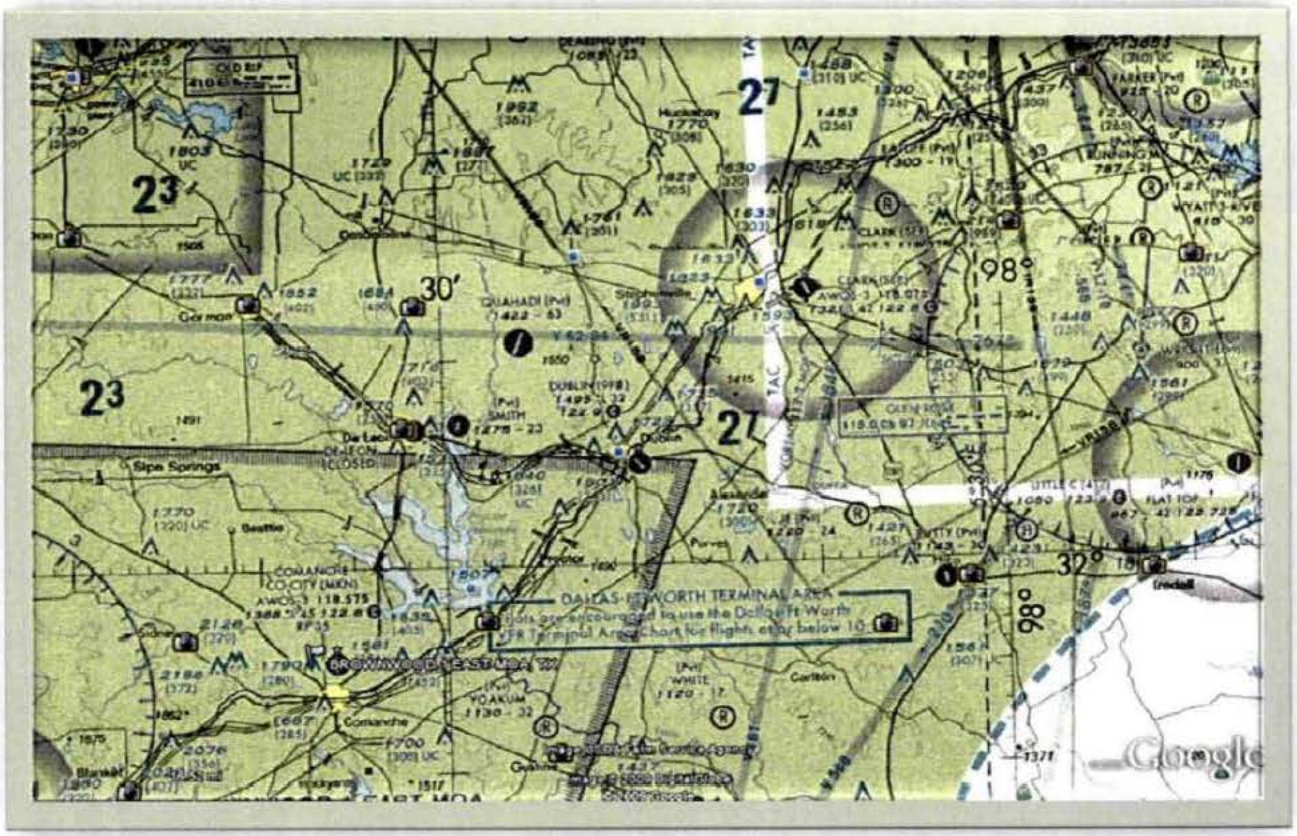

Figure 8 (20610) Witnesses line of sight (begins NW of Comanche 10 miles) led his view across Lake Proctor toward area of other sightings and is itself well into the Brownwood Military Operating Area as shown.

20616 – Hico

i begin in saying that this is not an unordinary event as we see these lights every once in a while outside in our yard .we live way out in the country 8 miles out from a town so at night it is quite easy to see anything in the night sky. We never have reported these sightings as a lot of people do around here as we live 8 miles from Stephenville TX and 10 or so miles from Dublin Texas. but last night we saw the lights at the same level in the sky .(direction and level not available at this time).id say at least 7 of these. It was around dinner time so i was in the kitchen at first and since the lights had been seen lately we had been looking outside once in a while at night.

My husband and i walked out and were only out for a minute and then we saw them...i guess that was a lucky thing. I didn't have to wonder what it was since these lights have been seen here off and on for quite a while now...guess they like the dairies around this area of teas. The rather round orange lights (that look almost all the same size)just last a few seconds then they disappear.

Of course your real excited when we are seeing these lights..and then they are gone (maybe not really gone, just change position so we can no longer see them)..almost always afterwards we see the blinking of jets and hear the jets coming in the area. Have not reached this witness and have no reply to email.. Since we had had some news only a couple of weeks ago about the unexplained lights again in the Stephenville paper people in this area start looking around at night again to see UFOs. Actually we had seen the lights last October and were waiting for this October to look again ..but it was cloudy most of the month. Now it is November and we saw them last night.

More to come in this section-

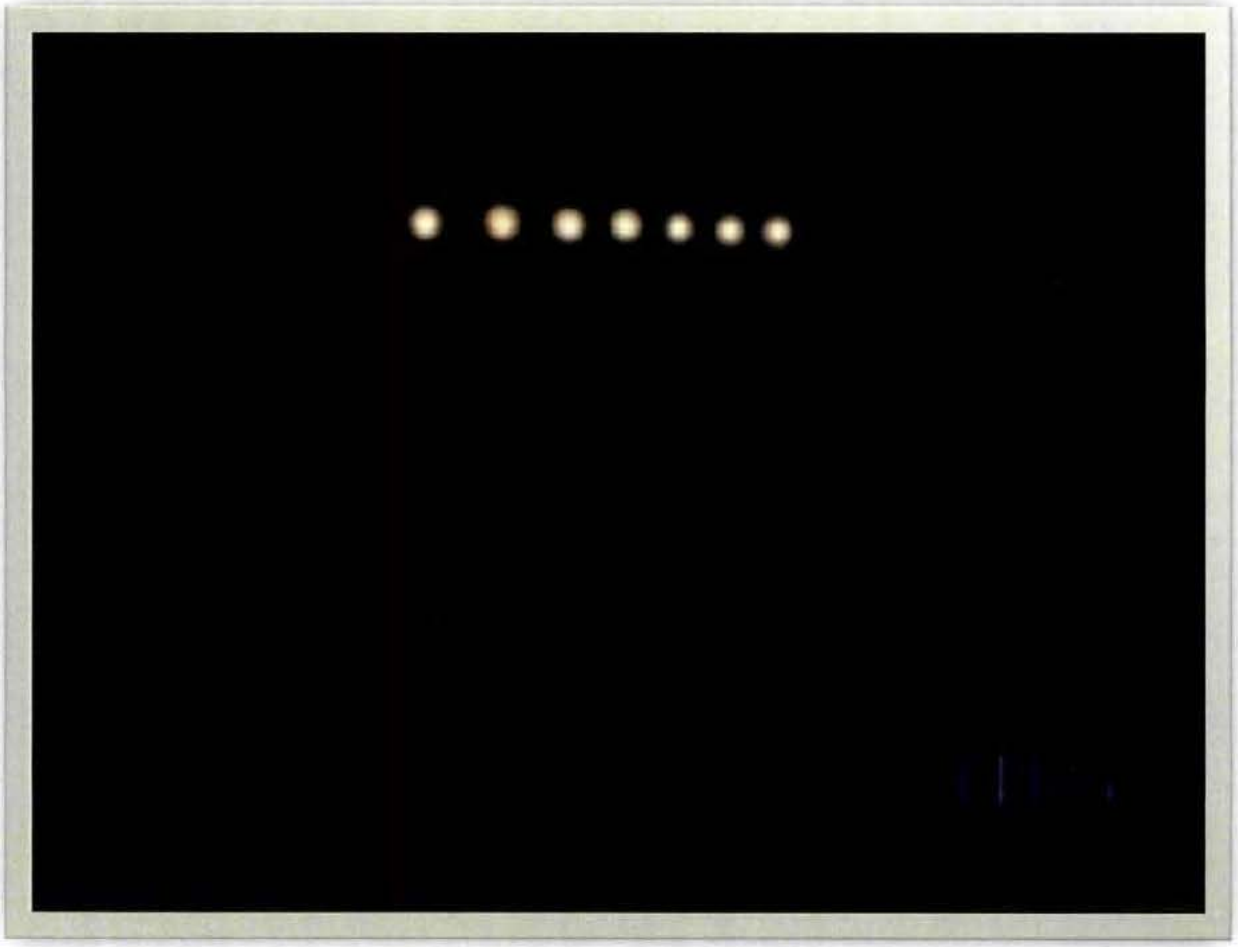

Figure 9 (20616) 1843(a)(2) of Lights in the Texas Sky pulled the MUFON report off CMS and created a drawing based on the sighting report.

20618 – De Leon

My mother and i were leaving De Leon Texas on hwy 6 and just pass the Leon river bridge in the clearing I happen to see a flash up in the sky. As I looked i seen 4 sets of lights in a straight line like castle top orange and white in color and very bright like an explosion. And a moment later there was another one to the left of the first. The one on the right disappeared and the left appeared. And for a brief moment they were together.then they both were gone. They were large in size and did not to appear to be very high in elevation. From highway 6 they were southeastward from me towards Comyne, Lake Proctor, or northwest Dublin. Strangest thing my mother [redacted] and I have ever seen. Orange/white lights in a semi straight line in 4 sets, then a second lights the same .flash and hold then again to the left 2are shown.

1843(a)(2)

Investigator calculated from witness description of visual through a car front windshield that the object was 30 degrees off the horizon. The witness gave a guess of SE as the direction of the sighting. From that sight, using witness directions, Investigator plotted the degrees of the sighting at app 140 degrees. There are red lights on wind turbines to the North with heavy air traffic in and out of DFW. . Of note, there are 2 rows of high-voltage power lines just south of Lake Proctor. This is just off hwy 377.Investigator spent some 30 minutes at the site on Tuesday night November 24th, 2009 at the same approximate time as the sighting for comparative purposes and to shoot directions. The sighting was in a L.O.S. directly over the "ghost town" of COMYN which isoff FM 1496. Witness also said that the lights came on in a "flash" as did the Santo witness.

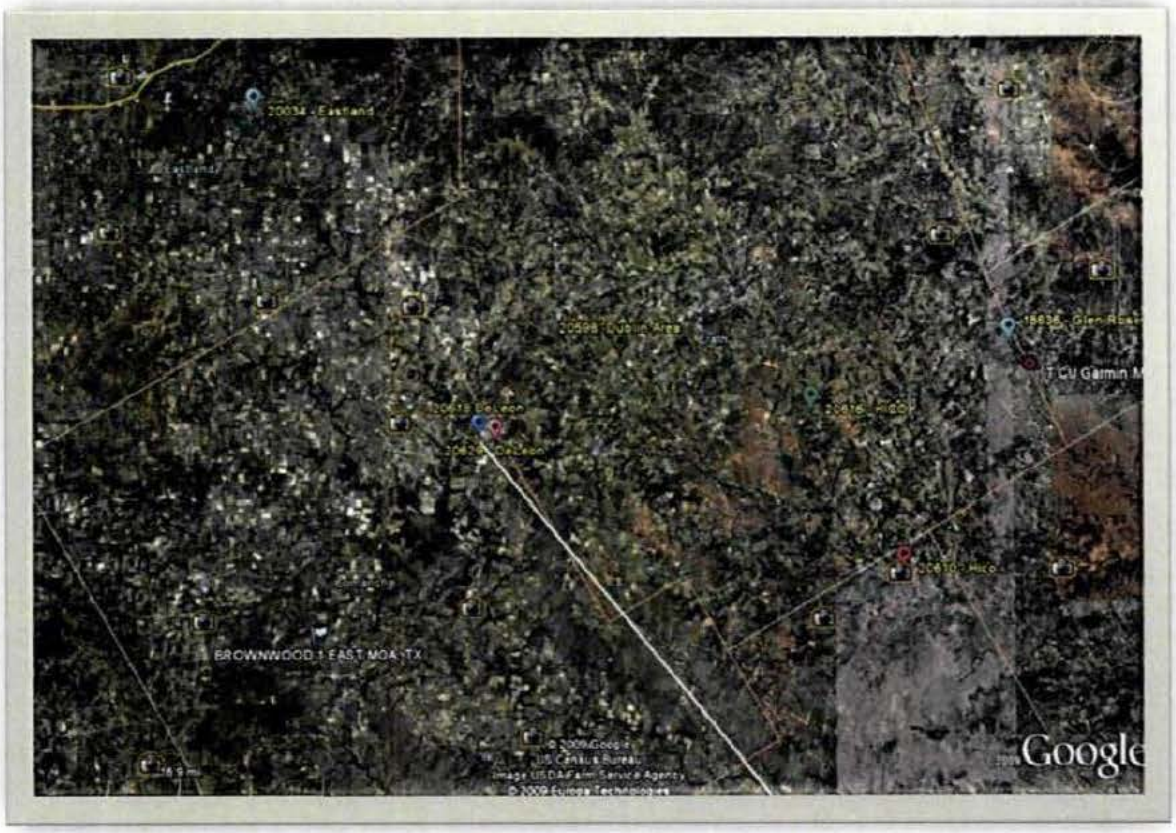

Figure 10 (20618) L.O.S. at 177 degrees

20629 – Dublin

I was driving home from De Leon Texas toward Dublin....Was about 5 miles out of Deleon...when 4 or 5 very bright circles appeared in the sky....
3 large and 2 smaller....It appeared that the smaller ones moved toward the large one like a child to its mother, very very fast then they shot upward what looked like they disappeared behind the clouds .

Part of this statement about clouds does not match the other witness statements or the weather bureau. Further checks will be made later. Also, this is one of the statements in which the lights move quickly. Others suggest differently. Witness said it was nearly dark which falls into line with the other statements.

None of this lasted very long....Lights were very bright nothing else was in the sky....I had no idea what these were, but I knew they were not jets, Jets do not move that fast... Did not mention this to anyone but I did see where a couple my age noticed the same thing.... 4 or 5 bright circles ; West of Dublin..

Picture shows five lights...2 large and 3 small ones. The following from an email:

I saw 5 objects (circles) 2 the size of golf balls and 3 the size of a dime one large one and 3 small ones where in a line with one large one at the rear but upward about what looked like maybe 8 to 10 feet.

. A check with the Dublin police department did not show any "lights" call on that day or the next. A later visit to the newspaper office uncovered small article about another sighting on that night. This coincides with the other sightings. The article also indicated 4-6 orange balls"just East and South" of town.

Sighting lasted a very short time and there was no noise. Witness indicated that there were jets in the vicinity. The first witness in this case is retired from the Air Force and 1843(a)(2)

Mystery lights are back!

What's Inside

Figure 13 (20629) "Mystery Lights" article refer to the same sighting by another witness

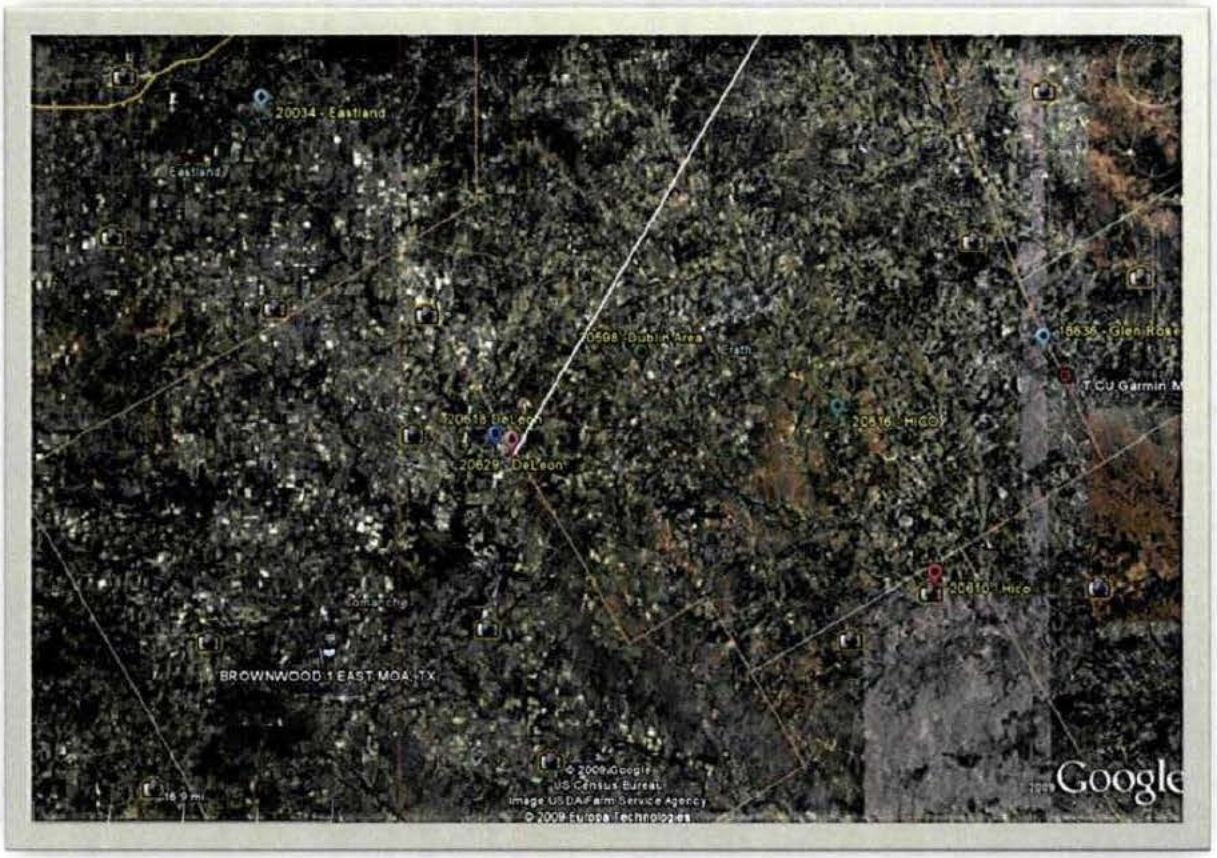

Figure 14 The (20629) sighting was in the NNE direction at app 30 degree

20660 – Breckenridge

This witness described the light in the following: 2009-11-18 20:05:00 was at my home, which is East of Breckenridge. I noticed what I thought was a commercial jet flying East to west in same flight path as an earlier plane but noticed the lights did not disappear (flash), like navigational lights.

V66 is the commercial air route visible from witness location. "Visual routes are used by the Department of Defense and associated Reserve and Air Guard units for the purpose of conducting low altitude navigation and tactical training under VFR below 10,000 ft MSL at airspeeds in excess of 250 knots IAS".(FAA Special Use Airspace & Air Traffic Controlled Assigned Airspace website)

These lights pulsed in sequence. I got my binoculars and saw 4 amber (orange/white) colored lights in a row, with what appeared to be a smaller light on the bottom of the object near the leading end. The smaller light would flash red, then

white. As brightly lit as the object was, I still could not make out a fuselage, tail, or wings. If it were a commercial or military jet, I should seen an outline and would have heard the sound of jet engines, however, there was complete silence.

If it had been a helicopter, I doubt I would have heard it(too high, too far away), and at that distance I would have barely seen it, if at all. I ruled out jet aircraft and helicopter.

The object appeared to be at an altitude of about 10,000 feet and perhaps 20 miles from my location. By my estimate, it was traveling in the vicinity of I-20, heading west. When I first saw the object, it was in the direction of Morgan Mill, TX, which is to my SE. At it's closest, the object was probably slightly north of Cisco, TX. I lost sight of object when it simply disappeared in the direction of Baird, TX. Observation lasted approx. 2 minutes.

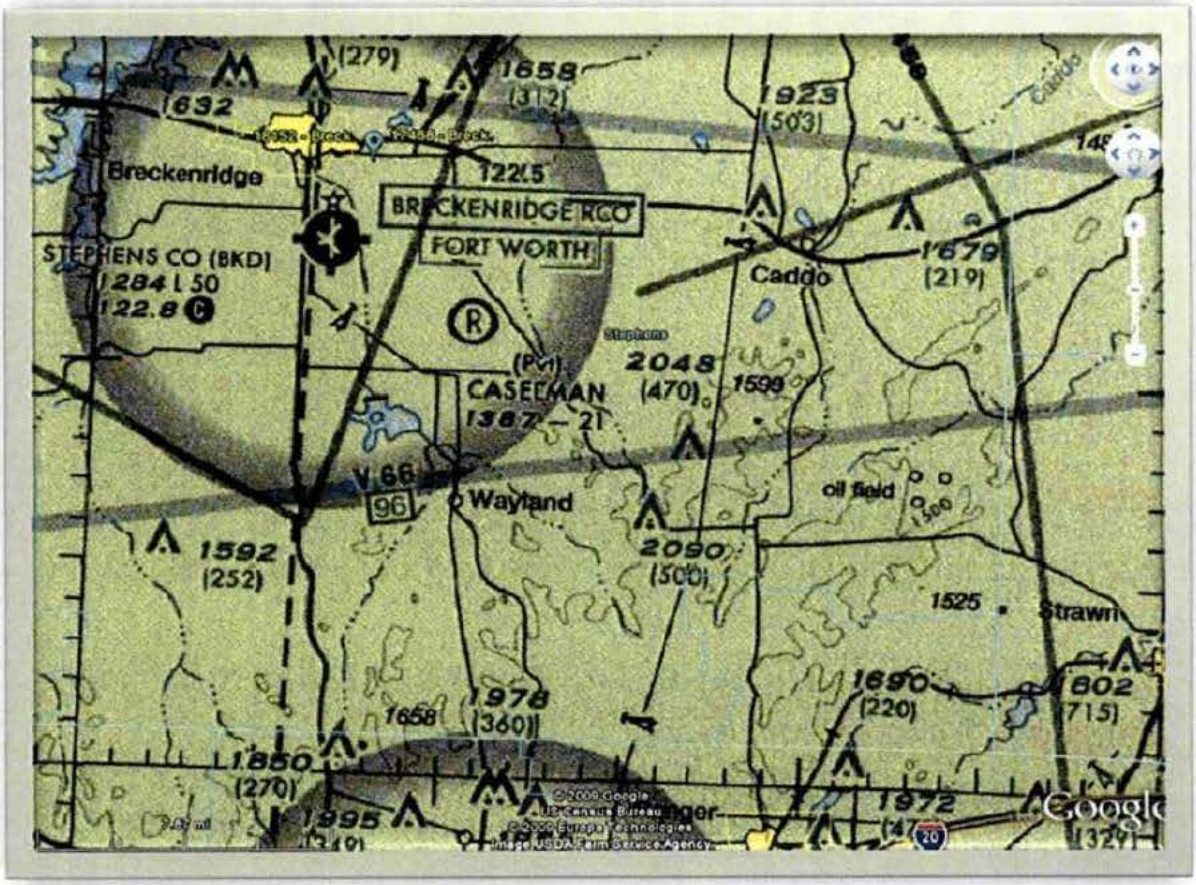

Figure 15 (20660) Breckenridge is between to flight routes.

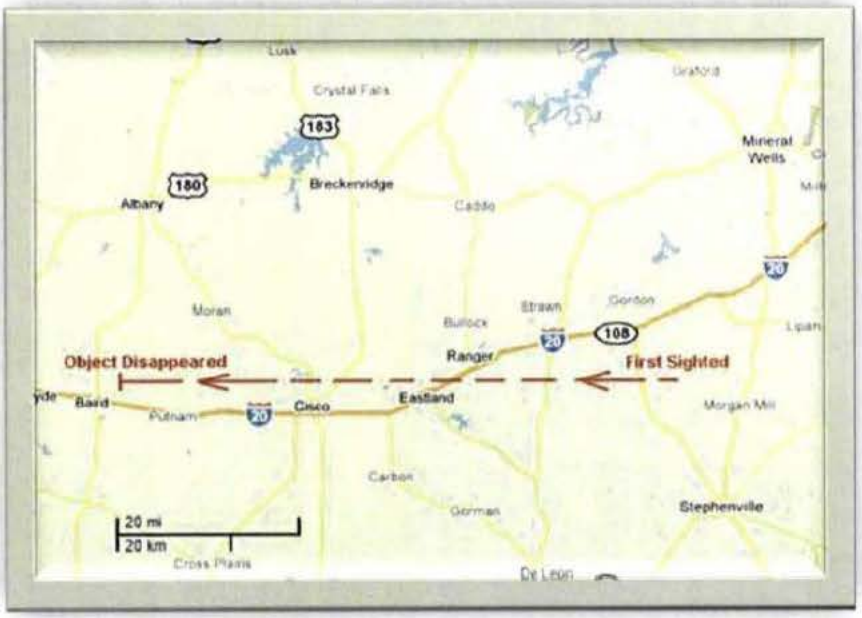

Figure 16 (20660) Light in the Texas Sky depiction of lights track

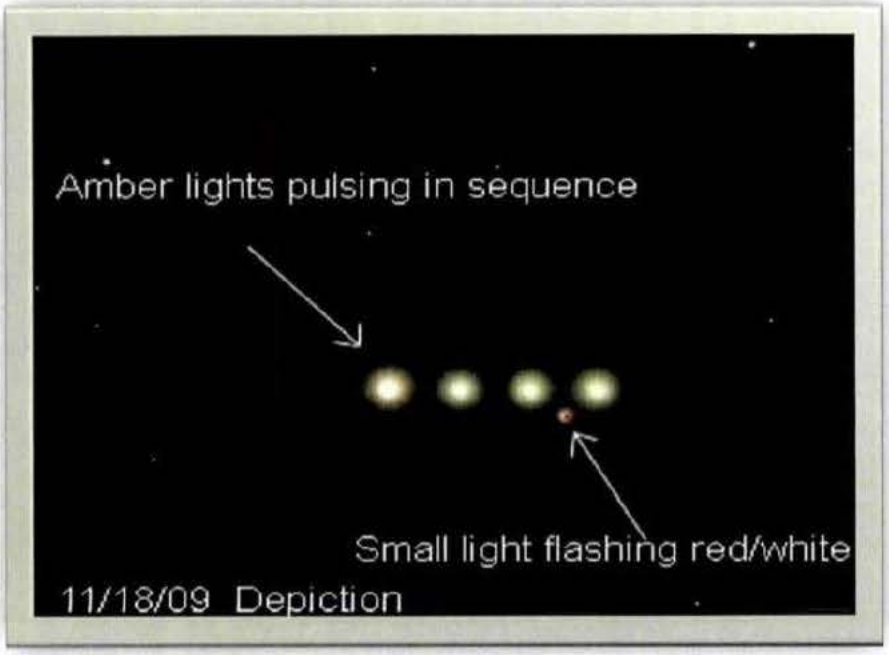

Figure 17 (20660) Depiction of sighting by 1843(a)(2) of Lights in the Texas Sky

OBJECT DESCRIPTION: See various case files above

EVIDENCE: Back in October this newspaper article came up and seems to describe some of the same type of "lights" activity that would be seen a month later. Such repetitious activity suggest a military influence and control...

They're baaaack (again)
Unidentified lights reappear in Erath

By AMANDA KIMBLE
Staff Writer
amanda.kimble@empiretribune.com

Published: Tuesday, October 20, 2009 4:52 PM CDT

Area residents are once again reporting strange lights in the sky above Erath County, and much like the reports that flooded in following a widespread sighting in January 2008, witnesses say the amber glowing orbs are like nothing they've seen before.

In the most recent unexplained sighting, a Hamilton County businessman was greeted by the lights as he left a meeting.

Jerry McAdams, publisher of the Hico News Review and Hico ISD school board member, said he was leaving a board meeting Monday with a fellow board member when they saw two amber lights, which were level with each other and seemed to hover in the sky.

"They (the lights) were low in the sky and disappeared in about five seconds," McAdams said. "Then two more appeared, closer together."

He said the lights disappeared several times and reappeared seconds later. Each time the lights were the same amber color, and appeared at different heights and varying distances apart. McAdams said the lights did not move when they were visible or blink. He also said the lights were not like those typically associated with aircraft.

"They were not red, green or white. They did not flash like on an airplane," he said. "There was no motion. Each time they appeared, they were further to the left. I would say they came and went in three cycles."

McAdams said he could not determine the distance of the lights from his Hamilton County vantage point, but said the lights were to the west, in the direction of Dublin, in the southwest portion of Erath County.

"I have never seen anything like that before," McAdams said. "But I do believe what I saw was like previous (reported) sightings."

Two Dublin area neighbors, who asked to remain anonymous, were in their homes when the men walked out and saw "all kinds of lights, all across the sky" Monday.

The men captured what they saw on a cell phone. The grainy recording offers a glimpse of an amber light that appears in the sky several times, and captures the excitement of the group.

One of the men said they first saw a single ball of light, "not like a flashlight or aircraft," which suddenly spawned several other lights.

"It was like the lights were coming off the first ball (of light) we saw," the man said. "And they kept coming, one after another, and moved in every direction."

The man said the lights were white and amber and the whole spectacle lasted a little more than a minute. He said no sound was associated with the sighting, until jets rushed toward the display.

He also said he is not ready to say he saw an alien aircraft, but does believe the unidentified lights were impressive.

"I don't know what it was, but whatever the lights were, they were truly awesome," he said.

There were reader comment online about the article which give a little insight into how difficult it is for multiple witnesses to accurately describe an object when seeing the same thing.

Reader Comments

The following are comments from the readers. In no way do they represent the view of empiretribune.com.

dlbingham2000 wrote on Oct 21, 2009 11:57 AM:

" They were flares!! Saw them just east of Comanche County. Six F16's on maneauvers dropping flares. "

LOL wrote on Oct 22, 2009 12:53 AM:

" F16's engines can be heard-try again dbingham. Even from just past the Seldon cut off up on a hill you can hear the trains going though Stephenville at night. Come up with a craft we have doing this that can't make noise and I'll buy your side, until then their descriptions and yours just don't add up.
ET(Empire Tribune that is) they never left-LOL. "

kingtwiggy wrote on Oct 22, 2009 9:30 AM:

" Gotta agree with dbingham here. When I read the description that was the first thing I thought about. As for the sound, sure you can hear the train from the Selden cut-off...it's quite a distance but it's at rougly the same altitude. Planes will be much higher, and most likely much farther away so you don't always necessarily hear them. "

dlbingham2000 wrote on Oct 22, 2009 12:30 PM:

" I forgot to mention I live in Comanche so when I say east they were probably somewhere aroud Dublin. They were literally tearing up the skies. Six F16's. Saw them...heard them...watched them drop flares. So LOL maybe just maybe what you saw was something different. They are in this area at least twice a week. No UFO's here just jets and flares. "

LOL wrote on Oct 22, 2009 11:35 PM:

" Yep, even the weather can affect how far away things can be heard at night and from Hico to Dublin or Hamilton you wouldn't hear much due to the distance. I have a pretty good view of the Dublin skies now, but have never seen any of these reported events.
I am aware of an event though that cannot be explained away as flares, F16's, helecopters, stealth bombers and the like. It would be nice to know exactly what is was before I die, but alas that usually never happens in a lifetime. "

rolly254 wrote on Oct 26, 2009 9:53 AM:

" flares "

dlbingham2000 wrote on Oct 26, 2009 12:47 PM:

" Amazing it seems that 2 people can see the same exact thing at the exact same time and have 2 different explanations for what they saw. "

Inquisitive wrote on Oct 27, 2009 1:32 PM:

" Did anyone happen to see the bright light close to 377 toward FW around the area of the roadside park and the old barn that has the flag painted on the front of it? Monday October 19, about 5:45 AM. It was not up in the sky, but appeared to be around tree height level. "

Case Report MUFON SIP Deployment

Case # 20706 **CAT 2 MUFON Deployment**

Investigators: AAP Person 103 | AAP Person 104

GPS COORDINATES : 1843(a)(3)

COORDINATES ACCURACY: Exact, coordinates taken with GPS at effected area of event on Highway

Location: Port Jervis, NY objected headed towards Unionville

DATE OF EVENT: 11/25/09

TIME OF EVENT: 12:15 AM Local **( ) Exact (X) Approximate**

On November 25, 2009 , a STAR team CAT 2 Deployment was activated on Case #20706 in Port Jervis, NY. STAR Team Investigator AAP Person 103 was assigned as lead investigator. AAP Person 103 is the Chief Technical Advisor for STAR Team. Investigator AAP Person 104 was secondary investigator. AAP Person 121 was State Coordinator.

AAP Person 59

MUFON (Mutual UFO Network)

STAR Team Manager

SIP Project Coordinator

Background: The primary Witness is a 41-year old male. The Witness is a mental health professional and works 1843(a)(2) . He is married and lives with his wife at an un disclosed location in Port Jervis, NY. Investigators found this witness to be highly credible. He was still visibly shaken from his encounter.

Witness was very concerned about maintaining his anonymity in regards to this sighting report. He refused to sign a third party release form when asked by investigators.

The Witness did allow Investigators to Video tape the interview at his home, but requested the camera be pointed at the floor to protect his identity. Investigators also Videotaped the interview at the affected area along the road side, as witnessed pointed out the details of the event.

Witness Narrative: (CMS Sighting Report) *I left work at 12am as I work 4pm till 12am, I work in* 1843(a)(2) *which is approx 15 minutes from port Jervis where I live, the quickest route is to take the Minisink turnpike then to the Greenville turnpike, I was driving on the Minisink turnpike when I noticed lights in the sky, firstly I thought it was a plane then I noticed it had 5 lights on it from end to end the lights went from blue-white-red-white-blue in that order but the strangest thing was it was turning clockwise slowly and the only sound I could hear was like a cat purring, I slowed the car down to around 20 mph to get a better look then I noticed the size it must of been around 200 feet in length, I proceeded to speed up as I started to get nervous but as it passed over the car the car turned off. I came to a stop and grabbed my cell phone and noticed that had turned off too, by this time I didn't know whether to get out of the car and run or stay in my car before I came to the decision the lights had gone out and the car started up I put my foot down a sped up the road not looking back I tell you it was the most unnerving things to happen to me.*

Investigator Report: Investigators left Bowling Green, VA at about 1:30 p.m. on 11/26/09, arriving at Port Jervis, NY at 8:30 p.m. Investigators met with the witness at his home on 11/27/09 at 10:15 a.m.

- The witness works 1843(a)(2). He leaves work around midnight and it takes approximately 15 minutes to get home. He takes a route which goes through a rural area with curving roads. He said that he was "semi-tired but not tired enough to blank out." He was playing Christmas CDs on the radio and singing as he drove. He drove through Unionville up to the Minisink Turnpike. Coming around a bend in the road, he could see an object about a mile away – it looked pretty small. As he came to the next turn, he slowed down to about 25 miles to get a better look at it, then it was almost on top of him and he doesn't understand how it crossed the distance from where he first saw it to where he was in such a short time.

- He stopped his vehicle along the side of the road and remembers putting the car in PARK, with the engine running. He could now also see that it

looked cigar-shaped and was turning clockwise slowly (on axis) as it came towards him. He described the speed as slow like a hot air balloon. When asked to compare the size of the object to an aspirin at arm's length, the witness said that it would be about the size of a baseball.

- According to the witness description, there were lights (blue, white, red, white and blue in that order) so he knew it wasn't a plane. He heard a sound like a cat that was purring at a low frequency (continuously vibrating)

- As the object passed over the witnesses vehicle, the engine just stopped as if someone had turned off the ignition. The Witness tried to use his cell phone but it wouldn't work despite the fact that he always keeps it charged. He also tried to roll down the electric car window but it wouldn't work either. He thought about getting out. He opened the door slightly but then reconsidered and closed the door.

- When he looked at the lights they seemed very bright but they didn't illuminate the ground; the witness said he can't explain this aspect as it doesn't make any sense to him. The craft appeared gun metal gray against the dark sky.

- After about 1.5 minutes the craft's lights blinked out and the witnesses vehicle started up without any action on the part of the witness. He put the car into drive and put the pedal down. All he wanted to do was find someone, find civilization. He was terrified! He didn't even

- look in his rearview mirror and says there is "no way I'm going to take that road again." Witness recalled running through several STOP signs on the way home. He said that he nearly crashed the car into a fence he was so scared. The witness stated that he actually doesn't want to even drive along that road again.

- When he got home, he told his wife who said "well, maybe it was a plane" but the witness knows that it wasn't a plane. His wife also suggested that he call the police but he didn't see what good that would do. Instead, he paced back and forth and drank a beer. He was so unnerved that he couldn't sleep for about two hours. He then goggled "how to report a UFO" and the first thing that came up was MUFON. He said that he wrote down exactly what remembered in his report. He wants to know what it is.

Physiological (Medical) Effects: Witness reported that he had a toothache since his sighting but didn't notice any other physiological effects. He did not wish to be scanned for an implant. (investigator was prepared to conduct a magnetic scan)

AAP Person 103 **Physical Effects** - Investigator [redacted] inspected the cell phone and found it to be working properly.

Radiological Survey: Investigators checked the affected Vehicle for radiation, without any unusual readings (consistent with background)

Investigators surveyed the site of the event (road side) and reading at the affected area were consistent with background reading.

Electromagnetic- Electrostatic Effects: Investigators did find very significant abnormal readings on the subject vehicle with a tri-field meter. The witness was driving a 2009 Midsize 4 door sedan that was approximately 2 months old.

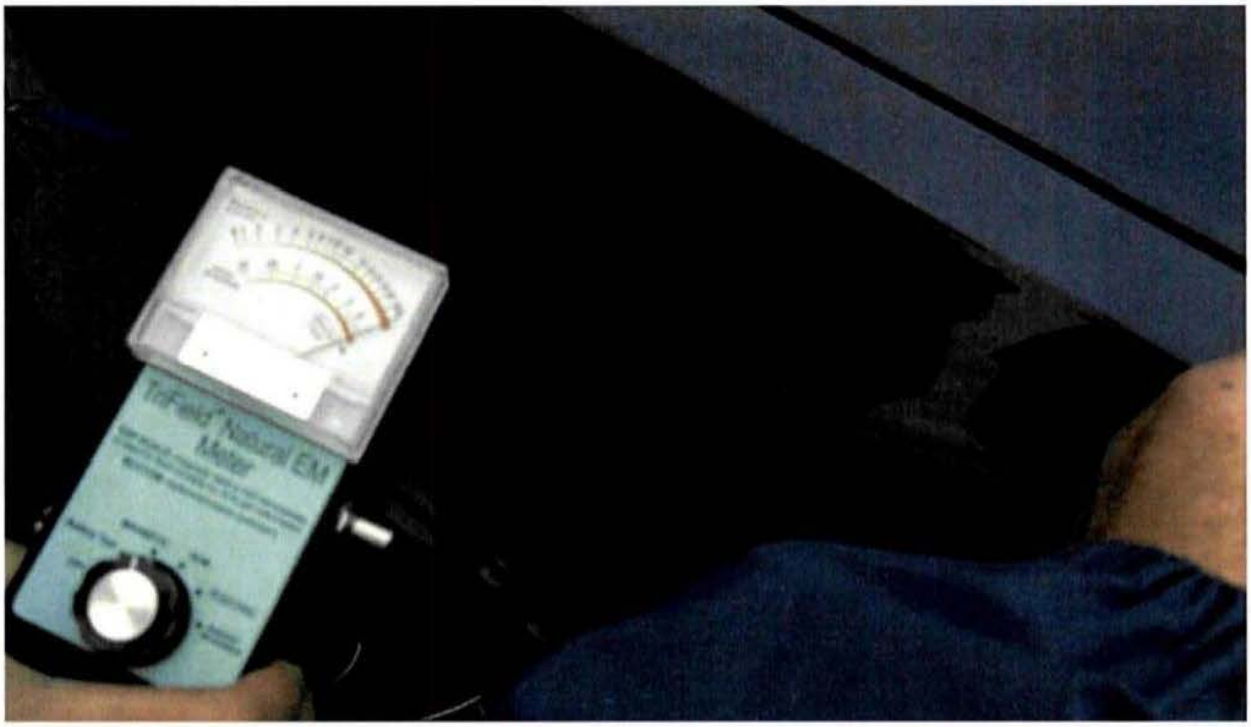

Investigators conducted electro-static and electro-magnetic field tests on the Witnesses Vehicle (SUBJECT VEHICLE) and then went to a car dealer and selected an identical vehicle to the witnesses vehicle (TEST VEHICLE) same make model and year for comparison testing.

Both the electro-static and electro-magnetic fields appear to have been dramatically affected. Specific meter reading (as to intensity) were not available, because the meter (pictured) pegged the needle in the proximity of the SUBJECT VEHICLE.

See photos next page

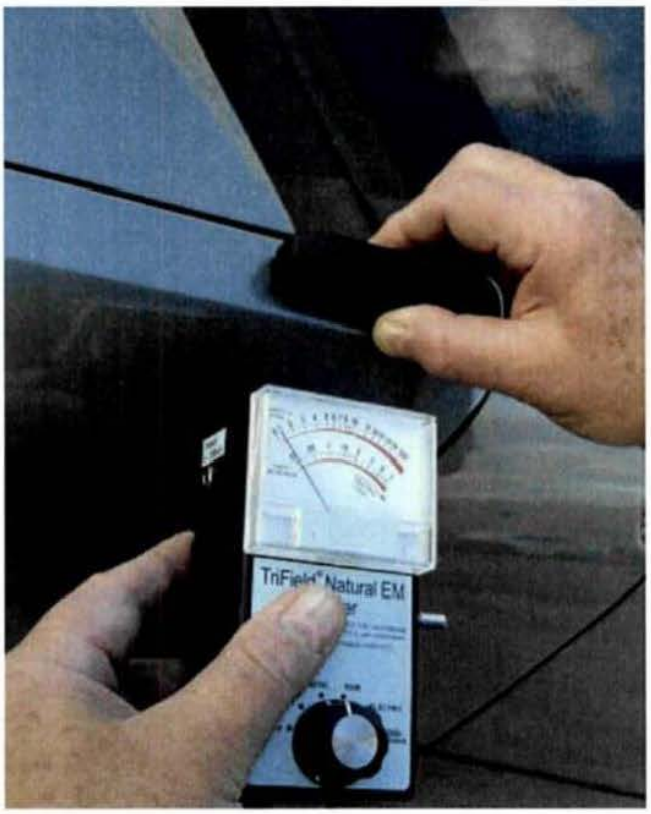

SUBJECT VEHICLE - Driver's side

rear engine compartment magnetic field reading. (Full intensity needle pegged)

TEST VEHICLE - Driver's side

rear engine compartment magnetic field reading.

SUBJECT VEHICLE - Passenger's side

rear engine compartment magnetic field reading. (Full intensity needle pegged)

TEST VEHICLE - Passenger's side

rear engine compartment magnetic field reading

Note: The witness said that it seems like the car is actually driving faster now...almost as if he got a free tune up.

AAP Person 103 **Note:** for unknown reasons, it appears that at some point during the investigation, [redacted] Nikon D700 battery failed and the backup battery also AAP Person 103 failed. [redacted] recalls, however, that at all areas which he checked on the witness' vehicle, the EMF meter remained at maximum reading as long as the meter was AAP Person 103 within 3 inches of the witnesses' car. [redacted] has no explanation for the camera's multiple battery failure. The batteries were charged beforehand and normally will take over 1000 photos with GPS enabled. The first photos were taken at the site AAP Person 103 of the event. [redacted] checked the camera's batteries after taking pictures at the site of the event and a 94% charge remained. [redacted] then returned to the AAP Person 103 witness' home to take photos of his two month old 2009 car. [redacted] took over AAP Person 103

100 photos of the witness' car. Only 12 photos documenting the magnetic testing and none of the EMF testing turned out. [redacted] then tested the exact same car model in a car dealer's lot with a digital camera ("test vehicle.")

AAP Person 103

Note: While we were with the witness, he had a telephone call which did not display a number and when he answered, there was no response on the other end. This has happened a couple of times since the event. The witness also states that his phone has been affecting his speakers since the incident and we heard a strange static sound ourselves. [redacted] checked the phone for electro magnetic and electro-static effects and found none.

AAP Person 103

Summary: The investigators did not notice any major contradictions in witness testimony, nor did the witness appear to falter in any of the questions of detail.

- Investigators found this witness to be highly credible. He was still visibly shaken from his encounter.
- The witness denies any medical conditions or taking any medications that affect his ability to think or concentrate.
- The investigators questioned for the possibility of lost time, without any indication of such, evident from the witness testimony.
- This Investigation yields a reliance primarily on a single witness testimony of events.
- Independent evidence was a electromagnetic and electrostatic effects on the effected vehicle as compared to test vehicle of identical make and model.

- Natural phenomenon was ruled out as a possibility because of the proximity to the witness, movement patterns, and contact/effects of the witness.

- A radiological survey was conducted and readings in the affected area were consistent with the background readings in the unaffected control area.

END REPORT

On November 02, 2009 a CAT 2 Star team Deployment in Tomball TX was authorized and investigator AAP Person 122 **was assigned as lead investigator. I accompanied the investigator and videotaped the witness testimony.**

AAP Person 59

MUFON (Mutual UFO Network)

STAR Team Manager

SIP Project Coordinator

- **Background Case #1** Nineteen year old girl comes home and hears a loud sound and looks out in her back yard and sees a disk like object floating in her back yard.
- **Background Case #2** Forty seven year old female in bed heard loud nose passed over her house, looked her out window and saw nothing.
- **Background Case #3** Unknown submitter stated that they saw an object in a field while traveling south bound on I-35 in Georgetown, Texas.

Synopsis:

November 2, 2009 this investigator received a deployment notification from AAP Person 59 in reference to female witness an object hovering in her back yard. In the report the witness stated that she had arrived home on November first around 21:57 hrs. Witness stated in her report that she was in the kitchen and heard a noise that kept getting loud. The witness then stated that she went to the back door and saw a saucer like object hovering about 20 feet in the air in her back yard.

During this investigation this investigator learned that two other sighting reports had been reported to the CMS data base. These sighting reports are linked together because they be related. Giving their time frame and the information in

the witness statements they should be added to this report to support the witness statement.

Investigator Narrative:

On November 02 2009 at 10:19 hrs this Investigator [AAP Person 122] received a deploy notice from SIP Coordinator [AAP Person 59] to investigate a possible sighting at *******, Tomball, Harris County, Texas. At 11:20 hrs this Investigator contact the witness by public service and a meeting was setup for 13:00 hrs. At 13:15 hrs this Investigator met with the witness at her residence. This Investigator interviewed the witness to get a better idea of what she saw. This Investigator had the witness to show me where the object had been in the back yard. The witness proceeded to the back yard and in the south west corner of the yard, where the witness stated the object was above this Investigator located plants that appeared to be under stress from some type of radiation or heat.

During my investigation the owner has a large white dog that was sick and was throwing up. I questioned the witness about this and she stated she had no idea what was wrong with him. At 13:20 hrs witness stated that the school had called and someone had to go pick up her nephew. The school had reported that the child was sick and was throwing up as well.

At 13:35 hrs this Investigator contacted [AAP Person 59] that the area in the back yard suffered from plant stress and the reported the illness of the child and pet. [AAP Person 59] stated to secure the area and not have anyone go in the back yard. [AAP Person 59] he was flying to Houston with the proper equipment to check the area for radiation.

At 18:15 hrs this Investigator picked up [AAP Person 59] at Bush IAH and we returned to the witness residence. At 19:26 hrs [AAP Person 59] and this Investigator arrived at the witness residence to check the back yard for possible radiation. [AAP Person 59] reported to the witness that there was no sign of radiation. [AAP Person 59] interviewed the witness and she stated that she was would be available for interview the next day after 16:30 hrs. [AAP Person 59] advised the witness that we would return the next day for video interview.

At 15:35 hrs this Investigator and AAP Person 59 returned to ********** to interview the witnesses in this case. (See Witness Statements)

Location#1:

This sighting took place at *******, Tomball, Harris County, Texas. This residence is a 1843(a)(2), 1843(a)(3). The residence is located on 1843(a)(2), 1843(a)(3).

Location #2:

This sighting took place at *******, Tomball, Harris County, Texas. This residence is a 1843(a)(2), 1843(a)(3). The residence is location on the 1843(a)(2), 1843(a)(3). Witness was not available for interview.

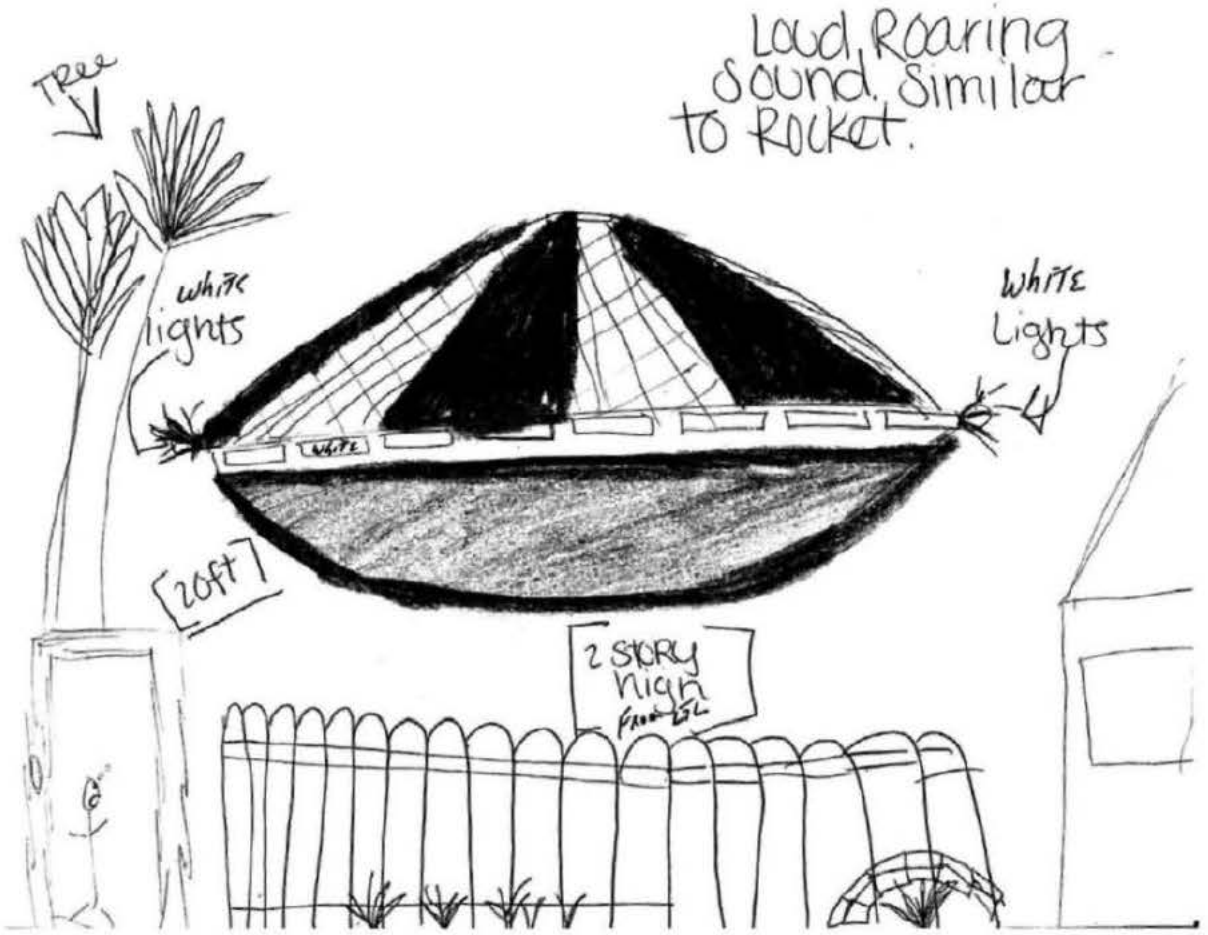

Location #3:

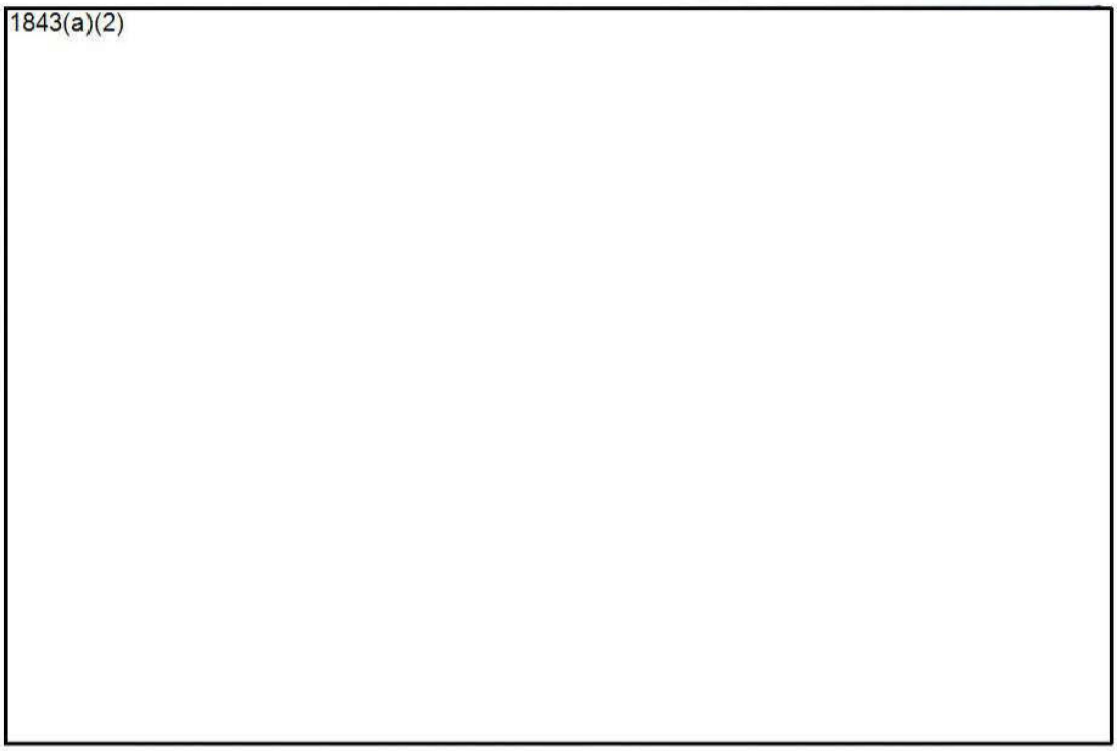

This sighting took place in the rural area of Georgetown, Williamson County, Texas near the highway I-35 south bound side. Witness was not available for interview.

Object Description: 20264

The witness reported the object to be about 20 feet in diameter and about 7 feet high. Witness reported that the object had a saucer like shape to it. The top section was reported to have more of a cone convex shape to it, with raised panels to it. The bottom section had a slight convex shape with a gray metal surface. In the middle of the craft witness stated that it had square lights light that seemed to go around the craft. The lights in the middle turned on and seemed too rotate around the middle of the craft when the witness went to the back door. The witness stated that the craft had a loud rocket sound. (See attached drawing by witness)

Drawing done by witness Case 20264

Location and appox. size of craft, photo and drawing not to scale.

Object Description: 20123

On October 24, 2009 received a report from witness she had heard a loud noise over her house about 0300 hrs. The location of this residence was given at ********Tomball, Harris County, Texas. Witness stated that she looked out the window from her bed room but saw nothing.

Object Description: 20268

On November 01 2009 at an unknown time a witness reported to the CMS data base a craft fitting the description (of the craft in case number 20268) setting in a field off of I-35 in or near Georgetown, Texas. Witness did not list any contact information other than an e-mail address of 1843(a)(2) . Further investigation on the e-mail address should be conducted.

Evidence:

Case 20264

On 11/02/2009 at 13:45 hrs this investigator photographed the outside residence includes the front and rear of the house. The area where the witness stated that

the craft was hovering plants appeared to under stress from an unknown heat source. (See attached photos) Photo on the left was taken by this investigator. Photos were taken with a Nikon 35mm 6006 with a 35 to 80mm lens. The type of film used was Kodak ASA 400. Note: that the end of berries had ash appearance and to the touch of it crumbled to a fine ash like substance. Notice in the photo "A" that the ends of the buds have been burned. In photo "b" the ends are normal without the burned.

1843(a)(2)

Abnormal photo

Normal photo

Evaluation of Evidence:

Case 20264

On November 04, 2009 at 11:24 hrs this Investigator met with 1843(a)(2)
1843(a)(2)
Houston, Harris County, Texas. 1843(a)(2) identified the plant as a Duranta. 1843(a)(2) stated that it was a common plant grown in the East Texas area and easy to obtain in most local nurseries. From the sample of the plant that was removed from the scene located at *******, Tomball, Harris County, Texas 1843(a)(2) 1843(a)(2) stated that the plant had been exposed to some type of heat. 1843(a)(2) 1843(a)(2) stated that the berries were over sized and the ends had been burned. 1843(a)(2) stated that at this time it is unknown what type of heat source would have caused the damage to the plant. During my investigation I noticed that there

was other plant life that had signs of stress, but they had no indication of burning. The child in question that reported to be sick the witness stated that he was fine and as well as the dog. This investigator could not find any sign of burning on the ground or the house. At this time it is unknown to this Investigator what caused the burning of the Duranta.

Evidence:

Case 20124

Nothing of value was collected by this investigator.

Evidence

Case 20268

Nothing of value was collected by this investigator

Physical Evidence:

Case 20264

A. 12 inch branch taken from Duranta bush located south west corner of the back yard. This evidence was collected to identify the type of plant and comparison.
B. Photographs taken by this Investigator
C. Witness statements take by AAP Person 59

WITNESS INTERVIEW

Case 20264

On November 03, 2009 at approx. 17:45 hrs AAP Person 59 interviewed the following witnesses at ******* Tomball, Harris County, Texas. Media Release forms were signed and dated by witnesses.

*******(See Video)

*******(See Video)

Witness Interview

Case 20268

No witness statement taken

Witness Interview

Case 20123

No witness statement taken

Findings of this Report:

This Investigator after interviewing the witnesses and reviewing the evidence in this case it is my opinion that this report should be listed as an unknown object. The lack of evidence i.e. photographs of the object it may never determine what the witness saw.

There is supporting evidence from the stress in the plants in the back yard there could have been something from an unknown origin. It should be noted that two other reports were made by witnesses on the same day and a week earlier.

EOR.

Summary of Utah Ranch

Investigations November 2009

This Utah Ranch Status Update is divided into 4 Sections:

(a) Utah Ranch Security Officer Events
(b) Report on Recent Utah Ranch Surrounding Property Investigations
(c) Status of Experiments on Utah Ranch
(d) 1843(a)(2)

(a)Utah Ranch Security Officer Events:

Since BAASS initiated round the clock surveillance of the Utah property on August 3, 2009 the security officers have reported multiple incidents: As described in previous reports, BAASS continues to deploy security officers to the ranch property. The following are selected reports from the officers with areas of potential interest detailed in yellow.

(10 November 09) 091110

Patrol/Observations

1.) 1843(a)(2)

1843(a)(2) At 1630 I, with [redacted] conducted a patrol along the southern tree line following the creek adjacent to Homestead 1 to the western property boundary. I took several photos revealing no anomalies/orbs. During this time I checked for signs of unauthorized people attempting to gain access to the property. I found no signs of trespassers or anything out of the ordinary.

2.) 1843(a)(2)

At 2030 I went to the East Gate with 1843(a)(2). There was no vehicle traffic/foot traffic while posted at the East Gate. I took several photos revealing no

anomalies/orbs. I returned to Homestead 1 to warm up and make contact with 1843(a)(2)

3.) 1843(a)(2)

At 2000 we conducted a tactical walking patrol to the West-side of the property and back. We stopped at Homestead 2 and Homestead 3 to conduct an LPOP. We scanned with NVGs; there were no signs of trespassers and or anomalies to report. We returned to homestead one to warm up.

4.) 1843(a)(2)

1843(a)(2) At 0025 [ ] was at the computer and [ ] was sitting on the couch ([ ] was in 1843(a)(2)
1843(a)(2) the restroom). The stereo beneath the TV in the living room all of the sudden turned on by itself. It was tuned in to the local country radio station. The last time the stereo was on was 4 Nov (on the same local country radio station). The remote control for the stereo was on the stereo speaker next to the stereo. All of the other remotes were on the coffee table. We took several photos in the living room revealing nothing out of the ordinary. The stereo has a power button that you physically have to depress to turn on or off. There were no strange feelings felt by 1843(a)(2) The temperature inside the trailer was 73 degrees. There were no strange odors or anything else out of the ordinary. I [ ] listened 1843(a)(2) to the stereo every day for two weeks my last time at the ranch and never experienced this occurrence. We decided to remain at Homestead 1 and observe for anything out of the ordinary. We took photos with the lights off also revealing no anomalies. We observed in and outside of Homestead 1 with no further findings.

Investigator Notes

The locks on Dog Run 1 and Dog Run 2 were still in place and locked. The pennies were in the same configuration as they were left.

1843(a)(2) departed at 0445 to take 1843(a)(2) to the airport.

Weather Note

33 degrees, clear, 0mph winds, 58% Humidity

V/r 1843(a)(2)

(17 November 09) 091117

Patrol/Observations

1.) 1843(a)(2)

At approx 1630, we conducted a patrol along the southern tree line with 1843(a)(2). During the patrol we checked for signs of unauthorized people attempting to gain access to the property. We found no signs of trespassers or anything out of the ordinary.

2.) 1843(a)(2)

At approx 2000, I went to the East Gate with 1843(a)(2). I took several photos capturing no anomalies/orbs. No security related incidents to report.

3.) 1843(a)(2)

At approx 2000, we posted at the Mesa with 1843(a)(2). We did not observe any activities and/or anomalies/orbs. At approx 2130, we headed down to the west gate to check for trespassers or anything out of the ordinary. We took a few pictures capturing no anomalies/orbs and everything was secure at the gate.

4.) 1843(a)(2)

At approx 0100, we conducted a patrol to Homestead 2 with 1843(a)(2) started to bark and growl at something outside of Homestead 2. 1843(a)(2) quickly scanned the area with NVG's but had negative findings. We took several photos inside and outside capturing no anomalies/orbs.

Investigator Notes

The locks on Dog Run 1 and Dog Run 2 were still in place and locked. The pennies were not in the same configuration as we left them in. The investigators were out here today so they may have touched them. [Subsequent inquiries revealed that the investigators were nowhere near the coins.]Other than that we have no idea what could have moved them.

Weather Note

21 degrees, clear skies, calm winds, 62% Humidity

V/r,

1843(a)(2)

(19 November 09) 091119

Patrol/Observations

1.) 1843(a)(2)

At approx 1700, we conducted a patrol along the southern tree line with 1843(a)(2) During the patrol we checked for signs of unauthorized people attempting to gain access to the property. We found no signs of trespassers or anything out of the ordinary. We stopped and checked the dog runs. The locks on dog runs 1 and 2 were in place. We also stopped by homestead 2 and checked on the pennies again. They had not been disturbed since the last check. See investigator notes below.

2.) 1843(a)(2)

At approx 2000, I went to the East Gate with 1843(a)(2) Nothing unusual to report. Dogs were acting normal. No security related incidents to report.

3.) 1843(a)(2)

At approx 1930, we went to homestead 2 and 3 along with 1843(a)(2). We stopped and checked on the pennies again. They had not been disturbed since we last checked them. We decided to go to the top of the mesa and set up a LPOP. We had NVGs and the thermal imager with us. We found a good spot on top of the mesa with a good view of the field and the homesteads. We spent approx two hours observing but didn't see any sign of movement or anything out of the ordinary. At approx 2145, we headed back down to homestead 2 to check on the pennies again. They had not been disturbed.

4.) 1843(a)(2)

At approx 0025, we conducted a patrol to Homestead 2 and 3 with 1843(a)(2). At homestead 2 took several photos. We got a single picture with an anomaly/orb. We didn't observe or experience anything out of the ordinary other than the one photo. We checked on the pennies at homestead 2 again and they were undisturbed.

Investigator Notes

At approx 1350, we decided to go down to homestead 2 and check on the pennies. All four pennies were there but one of them had been moved. We did a thorough check of the surrounding area and didn't find any foot prints or any other signs of anyone or anything that might have moved the penny. It was sunny skies with no wind. We didn't have any strange feelings or smell any strange odors. Side note: 1843(a)(2) told us she had found a penny on her bed today and she had no idea how it got there.

1843(a)(2)

When I went to bed last night, I laid 4 coins on the nightstand next to my bed. I laid a penny, a quarter, a dime, and another quarter, in that order. When I woke up I noticed the quarter was moved away from the other coins in the same manner as at homestead 2.

Weather Note

21 degrees, clear skies, calm winds, 66% Humidity

V/r,

1843(a)(2)

(20 November 09) 091120

Patrol/Observations

1.) 1843(a)(2)

At approx 1700, we conducted a patrol along the southern tree line with 1843(a)(2) 1843(a)(2). During the patrol we checked for signs of unauthorized people attempting to gain access to the property. We found no signs of trespassers or anything out of the ordinary. We stopped and checked the dog runs. The locks were still in place.

2.) 1843(a)(2)

At approx 2000, I went to the East Gate with 1843(a)(2). I took several photos. I did not capture or observe any activities and/ or anomalies/orbs. No security related incidents to report.

3.) 1843(a)(2)

At approx 2000, we posted at the Mesa with 1843(a)(2). We did not observe any activities and/or anomalous/orbs. At approx 2240, we walked down to homestead 2 and took a lot of photos and captured a few anomalies/orbs in several of the photos. We didn't notice any strange odors or have any strange feelings.

4.) 1843(a)(2)

At approx 0115, we conducted a patrol to Homestead 2 with 1843(a)(2) We took several photos. We didn't capture any anomalies/orbs. We didn't observe or experience anything out of the ordinary. We also checked on the pennies at homestead 2 and they were undisturbed.

Investigator Notes

1.) 1843(a)(2)

At approx 1534, I set up some coins in a straight line on the night stand in my room next to my bed and took a picture. As I write this, they are still as I left them. I will continue to monitor them and let you know of any changes.

2.) 1843(a)(2)

At 1319 I took some photos of the change I left on my nightstand to send with the report. At 1500 1843(a)(2) and I went to Roosevelt to get dog food. When I returned I checked my change to see if it moved at all. I noticed that the dime was moved up and the other coins were pushed together. The quarter that was moved last night was in the same place. I am not touching the change and I am going to monitor it another day to see if there is any more movement. I have a few other things on the night stand including my laptop. I make sure to keep my laptop away from the change. I have been very careful not to move the coins or disturb them in any way. I am 100 percent certain my laptop did not disturb the coins. I also moved to the other bed in my room.

3.) At 1815 we stopped by homestead 2 after the southern tree line walk to set up the

pennies. We set them up using the new bass protocols sent by AAP Person 44 We set up 5 pennies all facing SW. We put the pennies in order from lowest year to most recent. The years were, 1986, 1989, 1996, 2001, 2007. We used a ruler and spaced them all 1 inch apart. We centered the group of pennies on the cement block wall that is facing the road. We took photos of the pennies and they are all stored on a separate memory card.

4.) 1843(a)(2)

Last night I had a strange experience on the ranch. I could not shake the feeling that we were being followed and watched by something. I started feeling this when 1843 (a)(2) and I were on top of the mesa. I don't know why but I didn't say anything to either 1843(a)(2) Around 0130 when we were at homestead 2 think I ran into the anomaly. I walked away from 1843(a)(2). I walked north towards the road. I did not have the dogs with me. When I got near the trees I felt as if something was standing in front of me. I felt very threatening presence with this anomaly. I felt very warm and not cold at all, as it was trying to draw me into it. I immediately

backed up and took some pictures, checked with the thermal, and night vision goggles. Nothing showed up on anything. The dogs did not seem to notice anything. For some reason I didn't want to say anything to the other guys. After I took pictures and looked for it I didn't feel as if it was there anymore. I still felt as if we were being watched but from far away. I was very anxious and nervous. We then headed back to homestead one for the night. I don't know why I didn't tell then but I just didn't want to. I didn't feel comfortable telling them right away.

Last night when I was sleeping I had another strange experience. I went to bed around 3:00 am. I was in a very deep sleep and I felt a cold grip on my left ankle. The grip was very cold, almost like ice. I was under 3 blankets and very warm. I had two comforters, a soft blanket, and a top sheet. I tried very hard to wake up but no matter how hard I tried I could not wake up fully. I am a very light sleeper so this is very strange for me. Usually I am a lucid dreamer and can wake up whenever I want. When I felt the grip I awoke but I tried to open my eyes but couldn't get more than a quick glimpse. I tried very hard but I just fell back asleep. I tried as hard as I could to keep my eyes open but I couldn't. It was very strange. When I felt the cold grip I was able to kick my legs but I only got one kick with the left leg. I was trying to wake up but I couldn't. After I kicked I couldn't move anymore. I couldn't say anything or keep my eyes open. I got a quick glimpse of the room but didn't see anything. The cold grip was a very slender hand that reached all the way around my ankle. I felt as if the fingers were extremely long, not a human hand. My hand doesn't reach around my ankle. I still have 5 inches to go when I try. I didn't feel palm just fingers. It was about 3 fingers wide. I couldn't tell if it was threatening or nice. It happened too fast for me to get a good feel of it. I woke up around 5:30 am with no blankets on. I must have been tossing and turning quite a bit for my blankets to slide off. I slept until about 8:00 am and got up and called [redacted] about the experience and then back to bed. He advised me to move rooms which I will do later today.

AAP Person 44

Weather Note

23 degrees, cloudy skies, calm winds, 65% Humidity

V/r,

1843(a)(2)

(21 November 09) 091121

Patrol/Observations

1.) 1843(a)(2)

At approx 1615, we conducted a patrol along the southern tree line with 1843(a)(2) 1843(a)(2) During the patrol we checked for signs of unauthorized people attempting to gain access to the property. We found no signs of trespassers or anything out of the ordinary. We stopped and checked the dog runs. The locks were still in place. See investigator notes about pennies.

2.) 1843(a)(2)

At approx 2000, I went to the East Gate with 1843(a)(2) . I took several photos. In one of the photos I captured anomaly/orb. I didn't notice any strange odors or have any strange feelings. The K/9's were acting normal as well.

3.) 1843(a)(2)

At approx 2000, we posted at the Mesa with 1843(a)(2) . We did not observe any activities and/or anomalous/orbs. At approx 2215, we walked down to homestead 2 and took several photos revealing no anomalies/orb.

4.) 1843(a)(2)

At approx 0030, we conducted a patrol to Homestead 2 and West Gate with 1843(a)(2) 1843(a)(2) We took several photos. We didn't capture any anomalies/orbs. We didn't observe or experience anything out of the ordinary. We also checked on the pennies at homestead 2 and they were undisturbed.

Investigator Notes

1.)

Just before the southern tree line check, at 1530 1843(a)(2) stopped by homestead 2 to check on the pennies. All the pennies were moved except for 1989 which was in the middle. Penny 1996 was missing, Penny 1986 was flipped over and moved a couple inches south, Penny 2001 was slightly rotated counterclockwise and moved north, Penny 2007 was rotated more than 2001 but not moved as far.

2.)

At 2230 we stopped by homestead 2 to set up the pennies. We set them up using the bass protocols sent by AAP Person 44. We set up 5 pennies all facing SW. We put the pennies in order from lowest year to most recent. The years were, 1986, 1989, 2001, 2006, 2007. We used a ruler and spaced them all 1 inch apart. We centered the group of pennies on the cement block wall that is facing the road. We took photos of the pennies and they are all stored on a separate memory card.

(B) Recent Investigation of Reports from Witnesses who Live in the Area Surrounding the Utah Ranch Property

BAASS
BIGELOW AEROSPACE ADVANCED SPACE STUDIES

Skinwalker Ridge

(As named by Ute Tribal members over several generations)

Utah Ranch – November 16-19, 2009

Investigators

AAP Person 41 **and** AAP Person 14

Executive Summary

On November 16-19, 2009 **B**igelow **A**erospace **A**dvanced **S**pace **S**tudies (BAASS) Field Investigator's AAP Person 41 and AAP Person 14 travelled to Vernal, Utah to continue the investigation into the phenomenon reported at and around the AAP Person 4 ranch property. The intent of this trip was to re-contact 1843(a)(2) interview the individuals 1843(a)(2) had located for us and meet new neighbors, locate additional witnesses and find out if 1843(a)(2) had any additional information regarding the 1843(a)(2) friends or relatives who may have information surrounding the AAP Person 4 property. In addition, we wanted to locate an individual who was willing and able to introduce us to 1843(a)(2) 1843(a)(2)

During the course of our investigation numerous new contacts were made which resulted in 5 additional witnesses to either an unidentified flying object, a bright blue orb and/or a large dog like creature which stood and ran on its hind legs.

In addition, we met and spent a considerable amount of time with 1843(a)(2) who is a full blooded Native American and 1843(a)(2) Ute Indian tribe. 1843(a)(2) agreed to teach us about Ute tribal customs and the folklore surrounding the "Skinwalker Ridge" and surrounding areas 1843(a)(2) informed us we needed to continue to educate ourselves on Ute customs and traditions before we were granted permission to speak with 1843(a)(2)

In conclusion, we located and photographed the area referred to by the locals as UFO hill. We also located and photographed the 1843(a)(2) 1843(a)(2) and 1843(a)(2) but this last name has not been confirmed.

Investigative Report

Prior to our arrival on 11-16-09 at 1440 hours we located the 1843(a)(2) 1843(a)(2) is believed to be where 1843(a)(2) operates the 1843(a)(2) from. We decided to attempt to contact somebody inside 1843(a)(2) and see if we could identify 1843(a)(2)

I knocked on the door and was greeted by a white male adult approximately 30 years old. I informed him I travel through the area from time to time and wanted information regarding room rates and local activities. The host introduced himself as 1843(a)(2) no last name given, and told me 1843(a)(2) 1843(a)(2) told me there is local hunting, fishing and hiking and did not mention anything to do with the AAP Person 4 property or 1843(a)(2) I thanked him for his time and left the area where we continued on to Vernal, UT.

After returning to Las Vegas it is believed the [redacted] I spoke with at the 1843(a)(2) 1843(a)(2) " We believe his last name to be 1843(a)(2) but this has not been confirmed. We photographed the front of the Inn for identification purposes.

Upon arrival, we attempted to contact several people who were not home during our last visit. Again, 1843(a)(2) , the house directly in front of him and 1843(a)(2) were either not home or refused to answer the door.

On 11-16-09 at 1530 hours we met 1843(a)(2) in her front yard 1843(a)(2) playing with her young children. This residence

1843(a)(2), 1843(a)(3) AAP Person 4 property and the entire ridge or mesa is clearly visible. 1843(a)(2) is aware of all the rumors and Native American folklore surrounding the property and stated she has never witnessed anything out of the ordinary. She suggested we talk to her brother-in-law 1843(a)(2) during our next visit. 1843(a)(2) lives on the same property but is out of town for several days.

After speaking with 1843(a)(2) at 1615 hours we met 1843(a)(2) 1843(a)(2) lives one residence north of 1843(a)(2) is a full 1843(a)(2) blooded Native American and member of the Ute tribe. Approximately 2 1843(a)(2) years ago said he witnessed strange unidentified lights coming from AAP Person 4 the area of the ranch. saw a creature similar to the one 1843(a)(2) 1843(a)(2) recently seen on the property approximately 5 years ago. These creatures are werewolf's and can walk and run on their hind legs.

1843(a)(2)

The following is a summary of the conversation between 1843(a)(2) AAP Person 14 1843(a)(2) and Inv. AAP Person 41 and This conversation took place on 11/16/2009 at approximately 1615 hours; directly outside the residence of 1843(a)(2) resides with his parents. During our interview with 1843(a)(2) 1843(a)(2) there was some hesitation and resistance from 1843(a)(2) to speak with us regarding activity on the ranch and the surrounding area. 1843(a)(2) specifically told us he does not like people snooping around the area. The activities are none of his business and are the business of the family and individuals who reside on the property. 1843(a)(2) became more willing to speak with us upon our reassurance we are employed by the property owner and were simply looking for additional information regarding the area and wanted to learn more about the culture.

1843(a)(2) advised he is aware of the Skinwalker book, although he has not read the book. 1843(a)(2) stated the activities which occur are generally accepted as normal by the area residents. 1843(a)(2) stated he has lived in the area his entire life.

1843(a)(2) stated he has observed unusual lights and advised he has been on the Utah Ranch property, to retrieve a dog a couple years ago. 1843(a)(2) stated he got the opportunity to see the "famous dog kennels". With respect to the description of the lights he observed, he saw several lights, which he initially described as what he believed to be headlights, however with the lights disappearing and reappearing and single lights traveling on their own, he does not believe they were headlights from any vehicle.

We questioned 1843(a)(2) directly regarding the creature which has been reported by several individuals in the surrounding area. 1843(a)(2) acknowledged seeing the "invisible creature", as he described it, several years ago. 1843(a)(2) stated he heard a loud growling / howling noise. 1843(a)(2) stated upon hearing the howling sound he became, as he described it as being, paralyzed. 1843(a)(2) stated he was watching the creature, listening to the noise for what ended up being nearly three hours. 1843(a)(2) stated along with the howling noise, he could hear the creature breaking tree branches in the wooded area directly east of his house. 1843(a)(2) stated he had been outside looking for his dog, when the sighting occurred. This description by 1843(a)(2) is very similar to the creature description as given by 1843(a)(2) described witnessing a similar dark figured creature a couple months ago.

1843(a)(2) stated he went outside about midnight when he heard the noise and stated he must have lost track of time as when he returned back into the house it was nearly 0300 or 0330. 1843(a)(2) stated while he was outside watching and listening to the creature for over three hours, he stated without hesitation, it felt more like twenty minutes. 1843(a)(2) stated at

no time in the past or ever has he believed he was outside for over three hours. 1843(a)(2) stated this sighting / experience occurred within the last five years. However he was unable to provide a more specific time frame.

During our conversation with 1843(a)(2) he advised several times, the creature / lights are accepted as normal and area residents do not bother the creature or the lights.

1843(a)(2) stated we were welcome to come back to his residence in the future if we had any additional questions or needed anything in the future. We intend to return to obtain a more thorough interview with 1843(a)(2) during our next deployment to the Fort Duchesne area during the week of December 5-9, 2009.

1843(a)(2)

At approximately 1645 hours on 11/16/2009; we met 15-year old 1843(a)(2) at his residence located at 1843(a)(2), 1843(a)(3)

1843(a)(2), 1843(a)(3) lives here with several juvenile cousins, his cousin 1843(a)(2) and uncle 1843(a)(2) and two other adult white males who refused to provide their names. 1843(a)(2) is not a full-blooded Native American, however has a Native American heritage and is partial blood Ute.

AAP Person 14

The following is a summary of the conversation between 1843(a)(2)

AAP Person 41

and Inv. and This conversation took place on two separate dates. The initial interview took place on 11/16/2009 at approximately 1645 hours MST with the follow up interview taking place the next day on 11/17/2009 at approximately 1230 hours MST.

The front of the residence faces to the south and there were several vehicles, animals and children in the yard upon our arrival. 1843(a)(2), as it turns out, is the grandson of 1843(a)(2) while 1843(a)(2) is the great-grandson of 1843(a)(2) has been previously interviewed as his property lies 1843(a)(2) the Utah Ranch

property. We identified ourselves, and upon our identification, all parties stated they knew what / where we were talking about.

Initially there was some hesitation to speak with us as statements were made by these individuals whereby they admitted to actually being on the Utah Ranch property a few nights prior. 1843(a) (2) advised we were from the UFO Ranch and stated (talking to the unidentified white males) *"...you know, the place where you guys went the other night..."* There was some argument between 1843(a) (2) and the unidentified while males who denied being on the property. After acknowledgement by Inv. [redacted] and myself AAP Person 14 we were not there investigating any type of trespassing, all parties opened up and were more willing to speak with us. However the two adult white males continued to refuse to provide us with their names.

1843(a) (2) stated on three separate occasions, over the last three-years, he has witnessed a large dog like creature to the rear of his property standing on its hind legs. On all three occasions the creature was seen either standing or running on its hind legs with its front legs swinging near its side. On one of the sightings 1843(a) (2) and his uncle 1843(a) (2) who were target shooting directly behind their residence, shot at and appeared to hit the creature from a range of approximately 75-feet with a .30-.30 rifle, causing the creature to bleed thick black blood, although these shots did not appear to kill or have any significant effect on the creature.

Initially 1843(a) (2) stated the only thing he knew about the property was about a cow mutilation several years ago. After some additional unrelated conversation, one of the small children advised they had researched the Utah Ranch property on the internet, and had observed some lights.

The lights were last observed about three or four months ago, however a more specific time frame could not be determined. They described the lights as being completely white and believed to have originated from the area surrounding the Ranch property.

They further described the light as a circular type orb of light with a smaller red light traveling around the host light. Initially they were uncertain as to the exact height of the light; however they stated it was less than commercial airline traffic height and was about the size of a grapefruit held at arm's length.

They stated they watched the object for approximately 20-30 minutes, beginning at about 2300 hours. None of the witnesses were able to identify the object. Several times they simply described it as a ball of white light with a red ball of light traveling around it.

1843(a)(2) then advised, going back to the creature, they had experienced a couple of unusual sightings directly behind their house. 1843(a)(2) stated the first encounter happened about two years ago.

1843(a)(2) stated he was with his uncle when they observed what they originally believed to be a dog of some sort. 1843(a)(2) stated when they first observed the creature, it appeared to be a dog on all fours, however as they watched it; for unknown reason, they stated, it rose up and began walking on its hind legs toward them.

1843(a)(2) stated the creature, when standing on its hind legs appeared to stand over six- feet tall. 1843(a)(2) stated he believed the creature had reddish fur. This fur appeared to be shorter in length. The most noticeable feature of the unidentified creature was the deep red eyes. 1843(a)(2) stated on all fours the height of the creature appeared to be well above waist height as compared to him. 1843(a)(2) stated he did not stick around to get a good look at the face of the creature as he was very frightened. 1843(a)(2) 1843(a)(2) were both relieved to hear there had been other reported sightings of similar creatures.

1843(a)(2) stated the creature did not make a sound, however with respect to smell, 1843(a)(2) stated the creature smelled like *"...real bad wet dog..."* 1843(a)(2) stated he was approximately 30-yards away from it during

the initial sighting. 1843(a)(2) stated he estimated the creature was running with approximately five-foot distance between each stride and covered a great distance in a very short period of time.

1843(a)(2) stated about two or three months ago (fall 2009) he had another encounter where he witnessed an identical creature to the first encounter. On this encounter; 1843(a)(2) stated he was with his younger cousin and they were in the same general area as the first encounter; however he observed the creature from a distance of approximately 50 yards. Again 1843(a)(2) stated the creature moved with a great deal of speed.

1843(a)(2) stated he was along the creek when they heard some splashing in the water behind them. By the time they turned around to see what was behind them, they heard the brush on the embankment rustling. As they climbed the embankment and got to the top, 1843(a)(2) stated both he and his cousin observed the dog like creature running on two legs, in a north-east direction away from them. 1843(a)(2) stated the creature appeared darker in color; however he stated it was quite a ways away; however 1843(a)(2) could clearly identify pointy ears. 1843(a)(2) stated the sighting occurred around noon time. 1843(a)(2) stated he felt as though it (the creature) was identical to the one he observed on the prior sighting.

1843(a)(2) stated on both sightings the front legs appeared to be more like arms than dog legs. 1843(a)(2) stated it was difficult to explain.

1843(a)(2) stated about 18-months ago (spring 2008) he and his uncle was target shooting directly behind their residence when they observed the dog like creature. 1843(a)(2) stated the creature was on the edge of the embankment, near a dead horse which was in the ravine. 1843(a)(2) admitted they did shoot at the creature with a .30-.30 rifle 1843(a)(2) stated he knows they hit the creature at least three times, as they heard the distinct sound of the projectile impact the creature.

1843(a)(2) stated the creature did not contort or move in a reactionary type movement indicating it had been hit by the projectiles, however the creature did whimper, *"...like if you kicked a dog..."*, he described. 1843(a)(2) did not advise if the creature "whimpered" after every shot, he simply stated it whimpered when they shot at and hit it. 1843(a)(2) stated they did observe blood; however there was no flesh evident near the place where the creature was observed.

1843(a)(2) stated the blood thicker than normal blood was very black in color and had a very distinct foul odor. 1843(a)(2) stated it was not like the first encounter when the creature smelled like a wet dog. [redacted] stated the 1843(a)(2) smell was far worse and was a very bad odor. 1843(a)(2) stated he could not even compare how foul the smell was to anything else.

1843(a)(2) stated there was a small blood trail from where the creature was initially sitting and they shot at it, to where the creature disappeared from sight in the ravine toward the creek. 1843(a)(2) advised the largest of the blood spots was approximately the size of a half-dollar coin, with the smallest being the diameter of a pencil. 1843(a)(2) showed us the approximate location of the blood trail from start to finish and measured approximately twenty-five (25) feet in length.

1843(a)(2) advised after the creature disappeared from sight into the ravine, they ran up to the edge to see if the creature was lying near the 1843(a)(2) creek. [redacted] advised they did not see the creature; however they could hear the creature running through the trees and observed the branches of the trees and the brush along the creek side, moving. 1843(a)(2) did not advise they heard any sounds.

1843(a)(2) We asked [redacted] what he thought the creature was. 1843(a)(2) stated he did not know what it was. We asked [redacted] if he thought the creature was 1843(a)(2) 1843(a)(2) harmful or trying to hurt them and [redacted] advised he did not think so, the creature was simply trying to scare them off as they were encroaching on its territory.

1843(a)(2) stated his uncle 1843(a)(2) would also like to speak with us regarding similar incidents directly observed by him. 1843(a)(2) stated his uncle works in the oil fields and is not able to meet with us during the week, as he gets off at odd hours and is really only available on the weekends. We advised meeting up with 1843(a)(2) on our next trip would be better and we would most certainly like to meet with him at that time. We provided our 1843(a)(2) contact information to [redacted] as asked he forward it to his uncle and have his uncle 1843(a)(2) contact us to set up an appointment.

Several days later, I was contacted directly from 1843(a)(2) who advised he would very much like to meet with us in person and discuss his sightings. I advised 1843(a)(2) we would be returning to the area within the next couple of weeks and would very much like to meet with him. I advised 1843(a)(2) we would be in contact in the future to arrange the meeting.

1843(a)(2)

On 11-17-09 at 1415 hours we knocked on 1843(a)(2) front door and introduced ourselves as friends of 1843(a)(2) and employees of the owner of the property commonly referred to as mystery ranch. 1843(a)(2) 1843(a)(2) invited us inside and knew the property we were referring to. 1843(a)(2) taught us about the Skinwalkers, also known as Werewolves' and other spiritual beings which have been associated with the area for several generations. 1843(a)(2) full blooded Ute Indian and a 1843(a)(2) for the tribe.

The following is a synopsis of the conversation we had with 1843(a)(2) 1843(a)(2) sometimes referred to as 1843(a)(2). We were unable to obtain an actual physical address of the residence as 1843(a)(2) advised he gets his mail at the Post Office and we did not observe any street signs in the surrounding area. As a point of reference, from the Fort Duchesne stoplight on Highway 40, 1843(a)(2) and 1843(a)(2)

1843(a)(2) . This area is simply referred to as the 1843(a)(2)

We identified ourselves and advised we wished to speak with him regarding some incidents in the area and to learn of the Native American culture in the area. 1843(a)(2) stated depending on the subject we wished to discuss; he may be quite vague in his responses. 1843(a)(2) seemed very understanding with desire to learn from him and about his culture, while remaining respectful.

1843(a)(2) stated he was born and raised in 1843(a)(2) which is 1843(a)(2) 1843(a)(2) stated he is both a Korean and Vietnam veteran. 1843(a)(2) stated he served as a military advisor during the Vietnam War.

We advised 1843(a)(2) we were seeking insight into the spiritual beliefs, insight and history with respect to the stories we had heard from a great number of people in the area. We advised 1843(a)(2) we were specifically seeking education with about the dogs which walk on their hind legs. Upon hearing this, 1843(a)(2) immediately advised, *"...Oh yea, they're werewolves..."*

We provided a brief summary of all of the descriptions of the creature which had been provided to us. 1843(a)(2) advised there is a ranch down near the town of Ouray, which is named *Werewolf Ranch.* 1843(a)(2) advised you can see a lot of them down in that area. 1843(a)(2) did not provide any additional details as to the location of this Werewolf Ranch. A more specific location and directions will be obtained on subsequent visits with 1843(a)(2)

1843(a)(2) stated these types of creatures are all over and essentially it is a belief of the tribal people and simply because someone does not see them, does not mean they (creatures) are not there. One has to be

spiritually tuned in to their surroundings and beliefs. 1843(a)(2) said a very important aspect is an understanding and awareness of the beliefs.

1843(a)(2) stated they legends are part of the Native American culture and spiritual beliefs. 1843(a)(2) stated as part of their beliefs and one particular story involved the Native Americans, specifically members of the Choctaw tribe, observing Christopher Columbus prior to his arrival in the new world. 1843(a)(2) stated Native Americans had a pow wow and witnessed an individual standing on a rock, when one Native American attempted to speak with the individual, the unknown person did not speak and was referred to as "*Waceja*" (sp) which means white man. This particular member of the tribe looked into the bag carried by the visitor, which included weapons, ships and tools of warfare. 1843(a)(2) advised the white man advised they were coming to kill the Native Americans.

1843(a)(2) did advise a possible answer for the recent surge in sightings could be due to the current generation of Native Americans losing their heritage and losing the ways of the older generation. 1843(a)(2) stated back in the day, these creatures were used as scouts with their original purpose to seek out food and water for the tribe, stating this is what they were meant to do, however, now they are used to hurt people and harm people because this is what society as a whole has become, possibly indicating the harmful nature of the creature is a product an ever changing society.

1843(a)(2) stated this type of activity is primarily practiced in the southwest United States. When we asked as to whether the creature can take different forms, 1843(a)(2) stated yes, but primarily they take the form of a scraggy or a mangy dog-like creature.

1843(a)(2) clarified these creatures are not the spirits of individuals who have passed; rather they are actual individuals practicing in what he referred to as witchcraft, as it pertains to their spiritual beliefs. 1843(a)(2) stated these creatures nearly always take the form of dogs. 1843(a)(2)

stated while the creatures cannot speak directly, they can communicate, and specifically mentioned the howling, which they are known for.

Elaborating on the harmful nature of the creature, 1843(a)(2) stated if you believe in them, they are a fore-shadow of disease, sickness and the like and can be targeted to specific individuals. 1843(a)(2) advised these creatures have essentially evolved into the harmful, destructive creatures as this is what society in general has become.

1843(a)(2) stated the people who use these creatures and use this belief system to prey on individuals they are conflicting with. 1843(a)(2) stated his grandfather 1843(a)(2) with the tribe, while 1843(a)(2) 1843(a)(2) Additional information will need to be gained from 1843(a)(2) regarding the differences between the two tribal designations.

1843(a)(2) stated these creatures, with respect to the dog-like or werewolves are a completely separate and different entity from a "shape-shifter". 1843(a)(2) stated a shape-shifter is a person who possesses the ability to change into something else. 1843(a)(2) advised there are very few of these individuals left. 1843(a)(2) stated the terms "skin-walker" and "shape-shifter" are interchangeable and are the same entity or creature, but the words themselves mean the same.

It was our understanding the dog-like creatures and werewolves are the spirits of individuals, while the "skin-walkers" or "shape-shifters" are human beings with the spiritual power to change into something else. Again, additional clarification from 1843(a)(2) will allow for a greater understanding of these entities.

1843(a)(2) advised the individuals who are associated with these entities, possess a great deal of power and are respected and feared for this power.

1843(a)(2) stated the mesa near the Utah Ranch property is commonly known as "Skinwalker Ridge". 1843(a)(2) stated this area has was given this name generations ago and is simply an area known and accepted for this activity as this is the area in which they live and practice their beliefs.

1843(a)(2) stated the entities were given their name by the Navajo people, as they were the people who practiced the evil part of this. 1843(a)(2) stated the tribal name for these creatures is "*Ba-ha-we-snev*" (sp). 1843(a)(2) advised translated into English, this word mean Navajo wolves.

1843(a)(2) stated these creatures, while they are spiritual; they are capable of inflicting physical harm on people. 1843(a)(2) advised this physical harm can be actual physical injuries and / or sickness or disease.

1843(a)(2) advised these entities can be killed; however they will not die where then can be seen. 1843(a)(2) was asked directly if they were able to be shot at and killed. 1843(a)(2) advised these creatures have been shot in the past. 1843(a)(2) advised they go elsewhere to die, 1843(a)(2) advised you know you have hit them by the distinct sound of the projectile hitting the creature, however they will go off elsewhere to die.

1843(a)(2) advised while the white man can learn to see these things, the actual practicing of these beliefs can be very dangerous and harmful if the person does not know what they are doing.

We directly asked 1843(a)(2) if there was any tribal significance to the Utah Ranch property. 1843(a)(2) stated a great deal of his father's people lived in the area which is now occupied by the Utah Ranch property. 1843(a)(2) stated the ceremonies and rituals which took place in the area, the spirit of those involved and the significance of the rituals themselves remains. 1843(a)(2) advised the area does have some significance; and specifically mentioned "killing of some sort"; however he would not

elaborate further into this statement. In my opinion it seemed apparent 1843(a)(2) did not wish to discuss the area any further or provide any additional explanation at this time.

1843(a)(2) advised these entities do have the ability to kill a person. 1843(a)(2) stated people have been killed in the southern areas of the tribal lands, near Cortez, Colorado. 1843(a)(2) stated deaths such as these are generally not looked into by tribal members and are simply accepted for what they are. 1843(a)(2) will be very beneficial in obtaining additional contacts in the Cortez, Colorado area. Additional resources may be needed to explore this area of the Southern Ute tribe.

We asked 1843(a)(2) about the significance of the area on the west end of the Utah Ranch property with the inverted animal hides with the wooden posts and deceased animal carcasses. 1843(a)(2) stated he was not sure what this area would represent, but also stated he would be willing to go with us to view the area and he would let us know what, if any, significance this area held.

We asked 1843(a)(2) if there were other individuals with whom we would be able to speak with. We inquired about being able to speak with 1843(a)(2) seemed very apprehensive about allowing us to speak with 1843(a)(2) stated we would have to feel him out and let 1843(a)(2) know we wished to learn about and speak to him about the supernatural. 1843(a)(2) would not provide us with 1843(a)(2) contact information. Here again, it was made quite clear 1843(a)(2) did not wish to discuss further our desire to speak with 1843(a)(2) however he 1843(a)(2) did advise in the interim, we should seek out 1843(a)(2) who is the brother of 1843(a)(2) stated 1843(a)(2) is more open to discussing these topics, while 1843(a)(2) is not.

It seemed apparent; we had not yet earned the right to speak with 1843(a)(2) advised when you are fluent with the culture and rituals; you are allowed to speak of such things. 1843(a)(2) welcomed us to

return to his residence at any time and stated he would be glad to help us with our education.

1843(a)(2)

On 11/18/09 at 100 hours we spoke to 1843(a)(2) at her 1843(a)(2) 1843(a)(2) she 1843(a)(2) owns, was friends with the couple who owned the property prior to 1843(a)(2) being purchased by AAP Person 4 has had several unexplained 1843(a)(2) experiences since the late 1960's. has witnessed a dome shaped UFO and a golf ball size bright blue light about 50' in front of her as she drove her car. All these were in close proximity to the AAP Person 4 property. Her Father has told her about the UFO's and other unexplained events and creatures which have been associated with the AAP Person 4 ranch for as long as she can remember.

The interview with 1843(a)(2) was arranged through Utah Ranch Property Manager 1843(a)(2) and 1843(a)(2) have been friends for approximately 10-15 years and have been friends long before 1843(a)(2) became the property manager for the Utah Ranch property.

1843(a)(2) advised she has lived in the area for the majority of her life. She was born and raised 1843(a)(2) and with the exception of a short stint of about 1843(a)(2), she has lived the 1843(a)(2)

1843(a)(2) stated her father was a "ditch rider" for the tribe back in the day and was in charge of irrigation ditches, controlling the head gates and water flow on the irrigation canals on the reservation. 1843(a)(2) stated her grandparents homesteaded in the Randlett area in the late 1800's. 1843(a)(2) advised she resides 1843(a)(2), 1843(a)(3)

1843(a)(2), 1843(a)(3) the Utah Ranch property.

1843(a)(2) stated she was also familiar with and friends with the previous owners of the Utah Ranch property, 1843(a)(2). 1843(a)(2) advised she knew 1843(a)(2) very well as she knew 1843(a)(2) who worked 1843(a)(2) at the time and became close friends with them.

1843(a)(2) stated she is aware of the rumors and stories regarding the cattle mutilations and various other stories; however she admitted she does not have first-hand knowledge of any specific event and was never witness to any of the events taking place on the ranch or in the immediate surrounding area.

1843(a)(2) stated she was not personally informed of any stories from 1843(a)(2) however, she advised, she did observe a very noticeable change in the demeanor in 1843(a)(2) stated just prior to the 1843(a)(2) departure from the Ranch, 1843(a)(2) looked "hammered". 1843(a)(2) stated 1843(a)(2) had lost a considerable amount of weight, and displayed a marked change in personality.

1843(a)(2) stated 1843(a)(2) who was normally a very personable and talkative person, had become very withdrawn and subdued. 1843(a)(2) was very bubbly and outgoing, however near the end and over the course of a couple years, she noticed this change occurring. 1843(a)(2) was unsure as to how long exactly the 1843(a)(2) resided on the property.

1843(a)(2) also stated she was acquaintances with the 1843(a)(2) family. The 1843(a)(2) 1843(a)(2) did not elaborate further into her relationship with the 1843(a)(2) family, other than to state she knew them from when she would go to the ranch with her father as a child.

When asked specifically about stories she had been told by her father, she related a story about an old bootlegger who had once resided on the ranch property. One day this bootlegger disappeared without reason or explanation. 1843(a)(2) stated this individual was never heard or

seen from again. 1843(a)(2) stated she believed this unknown individual resided on the property prior to the 1843(a)(2) taking possession of the property. 1843(a)(2) stated from the best of her recollection she believed this bootlegger lived on the property back in the 1930's, however she was uncertain.

1843(a)(2) stated she did not know the 1843(a)(2) family. She remembers the name, but was not sure if she knew them or not. She admitted she knew the 1843(a)(2) had purchased the property from the 1843(a)(2) but did not have any specific memories of them 1843(a)(2)

1843(a)(2) stated she specifically remembered when she was growing up as a child; she would often go with her father to change / regulate the head gates on various properties within her father's designated area. Normally, she advised, she would be allowed to play in the water near the head gates; however every time they worked on the Utah Ranch property, her father forbids her from even exiting the pickup. 1843(a)(2) stated there was never any type of explanation given as to why she was forbidden from getting out of the truck on the ranch property.

1843(a)(2) advised her father, 1843(a)(2), passed away about fifteen years ago and was previously employed with the Bureau of Indian Affairs 1843(a)(2) 1843(a)(2) stated her father's sister, 1843(a)(2) is 1843(a)(2) 1843(a)(2) mother. 1843(a)(2) is a previous employee of NIDS and was a 1843(a)(2) in the Uintah basin.

1843(a)(2) stated she believed on top of the mesa directly adjacent to the ranch property was a tribal burial ground. 1843(a)(2) stated the burial ground was marked with white rocks and a cross marking the burial site. 1843(a)(2) also advised she is familiar and friends with the 1843(a)(2) family. The 1843(a)(2), 1843(a)(3) (This is the previously mentioned Skinwalker Ridge). 1843(a)(2) advised she used to work 1843(a)(2) 1843(a)(2) son years ago.

1843(a)(2) again stated she is familiar with all the stories of the Utah Ranch property and surrounding area; involving the cattle mutilations and sightings, however she advised one such personal experience she had occurred 2-3 years ago about 2007 or 2008. 1843(a)(2) stated she believed it was in the early spring time.

1843(a)(2) stated she was coming home work in Roosevelt and noticed a blue light which she originally thought was a reflection in the windshield. 1843(a)(2) stated she made several turns in the road and the blue orb remained. 1843(a)(2) stated the blue orb was directly in front of her car. 1843(a)(2) stated it was approximately 50 feet in front of her car. [redacted] stated she 1843(a)(2) estimated the size of the orb to be about golf ball size. 1843(a)(2) advised the motion of the object was very fluid-like and seemed to mimic the movements of her vehicle. 1843(a)(2) stated the object appeared to maintain a steady distance from her vehicle. If she sped up, the object would as well. Likewise if she slowed down or made a turn. Everything she did, the object would follow without hesitation.

1843(a)(2) advised as she neared the area known as UFO Hill [redacted] 1843(a)(3) [redacted] the orb unexplainably shot off. [redacted] stated the 1843(a)(2) orb shot off in a 45 degree angle toward the west / southwest direction.

With respect to UFO Hill, she stated she has no idea how the area got the name. She stated the area has had the name for as long as she can remember. 1843(a)(2) acknowledged the area is on restricted tribal lands.

1843(a)(2) [redacted] stated the light of the orb or sphere was contained within the orb itself. She advised she did not emit any light. 1843(a)(2) recalled the 1843(a)(2) sighting lasted about 3-5 minutes. [redacted] advised she was not frightened until after she turned the corner and realized the object was actually there 1843(a)(2) and not simply a light reflection. [redacted] stated the sighting occurred in the late afternoon, and believed it was in the spring, but acknowledged she was not certain.

1843(a)(2) stated she had also witnessed what she originally thought was simply a star. 1843(a)(2) stated this sighting was within the past couple of months. 1843(a)(2) stated she was outside with her dog, when an unusually bright light caught her eye in the sky. stated as she focused on the 1843(a)(2) light, she observed and noticed the object to be zigzagging across the sky. 1843(a)(2) stated the object seemed to confine itself into an approximately three feet by three feet area in the sky (from her vantage point).

1843(a)(2) 1843(a)(2) stated she contacted to see if she could see anything. 1843(a)(2) stated she also told her husband who also saw the unknown object. stated upon seething this object, her husband retrieved his binoculars and watched the object through the binoculars.

1843(a)(2) stated while she was observing this unknown light, she also noticed an approaching aircraft. 1843(a)(2) stated this aircraft appeared to be a commercial airliner, and as the airliner approached the object, the object stopped dead in its tracks. 1843(a)(2) stated she watched the aircraft pass and after traveling past the object, the unknown object resumed its erratic behavior and movement. 1843(a)(2) could not remember how the object disappeared.

We then inquired of 1843(a)(2) about any unusual sightings or experiences in the general area surrounding her property or the ranch itself. 1843(a)(2) then advised she has noticed a very distinct hum in the background. 1843(a)(2) stated the hum as she described it was similar to that hum emitted from high-voltage power lines 1843(a)(2) stated it was so strong you could feel it rather than hearing the noise. 1843(a)(2) stated the hum seems to be coming from under the ground, and occurs most often at night.

1843(a)(2) stated she does not know the source of this hum. 1843(a)(2) stated the hum is strong enough to keep a person up and has on a couple of occasions woke her up. 1843(a)(2) stated she does not know if this hum is geological and stated she believed at one time it may be from the nearby oil fields.

We asked 1843(a)(2) if there were any other incidences or memories she could recall. 1843(a)(2) stated when she was younger; she and her brother saw a ufo and were subsequently interviewed by AAP Person 125 1843(a)(2) believed this interview took place in 1968 – 1969. 1843(a)(2) stated this sighting occurred about three miles east of Randlett and near the area of Pelican Lake.

1843(a)(2) described the object as a silver, flat-bottomed, dome on the top. 1843(a)(2) stated the object was not a saucer. She advised the object was the size of a normal room, approximately 12'x12'. She stated the object the simply hovering above a small group of trees where all the area children used to play. She advised this object was above the tree level, approximately 12 – 16' in the air.

1843(a)(2) did not recall any type of lighting on the craft; however she did notice a very distinct hum. She stated this hum was very much different from the hum she hears at her residence. She advised it was a light hum. She specifically noted the hum was not penetrating; however it was this sound which actually caught her and her brothers' attention. 1843(a)(2) advised she felt she was maybe a quarter or half mile away from the object when they noticed it.

1843(a)(2) stated both she and her brother were riding horses and the horses had a distinct reaction to the craft. 1843(a)(2) stated the horses became very tense and began snorting and would not go any closer to the object, no matter how much they tried to get the horses to move closer.

1843(a)(2) described the object as having a very smooth surface. 1843(a)(2) did not recall observing any type of lights or markings on the surface of the craft, nor did she observe any type of propulsion system. 1843(a)(2) advised the entire observation lasted only a few minutes. 1843(a)(2) stated this sighting occurred when she was about ten years old and her brother was fourteen.

1843(a)(2) stated when the object disappeared, it traveled at such a great speed, neither she nor her brother was able to visually track the object. 1843(a)(2) stated she did remember a distinct change in the noise of the craft when it disappeared. 1843(a)(2) stated it was not like a commercial jet when you can hear the engine noise trail off, this craft simply shot off and the sound was gone. The sound did not trail off; she described it as turning off a light switch with respect to the sound. [redacted] stated she feels this object 1843(a)(2) was manmade and specifically mentioned she felt it was a NASA test craft.

1843(a)(2) advised she feels there is a great deal of significance with respect to the tribe in the entire basin. 1843(a)(2) stated she feels the area surrounding the Utah Ranch property may serve as a portal of some sort. 1843(a)(2) stated if you can look into the portal, and someone walks through you can see this person. 1843(a)(2) stated the activities surrounding the Utah Ranch property and surrounding area have been occurring for so long, it is simply accepted by the area residents and they know not to bother it. 1843(a)(2) stated it was just accepted. 1843(a)(2) stated she refers to the Utah Ranch property as the "Spooky Ranch" or the "UFO Ranch".

On 11/17/09 at 0930 hours I spoke to 1843(a)(2) inside the 1843(a)(2) is the sister in law to 1843(a)(2) 1843(a)(2) is married to 1843(a)(2) who works with 1843(a)(2) was very reluctant to speak with us and said she is aware of the stories but has never witnessed or experienced anything out of the ordinary. 1843(a)(2) returned to work and our conversation ended.

On 11/17/09 at 1700 hours as we were concluding our day, we returned to the 1843(a)(2) and spoke to 1843(a)(2) was previously interviewed and during out conversation with him regarding additional lights in the Pelican Lake area, advised about 13 years ago he physically ran into a dark colored creature. 1843(a)(2) stated he was running from the police (on foot) in an area directly south of Randlett. This area is known as the swamp. 1843(a)(2) stated as he was running, he ran into this

unidentified creature. 1843(a)(2) stated the creature stood approximately seven (7) feet tall and he hit the creature in the lower chest area.

1843(a)(2) stated the creature did not say anything, and physically pushed him away. 1843(a)(2) stated the creature did not appear to be aggressive or want to do him harm, other than forcefully / physically pushing him away. 1843(a)(2) stated he very much remember the very distinct foul odor of the creature. 1843(a)(2) said he could not describe the smell, other than to say it was the worst thing he has ever smelled and nothing compares to it. This description is similar to the sighting of 1843(a)(2) in September 2009.

1843(a)(2) has also seen large dog-like creatures which walk on their hind legs. 1843(a)(2) had a very matter of fact attitude about him when discussing these experiences. 1843(a)(2) is very direct in his answers and makes constant eye contact. Like many other witnesses to these creatures, many do not seem to care if people believe them in their experiences.

It will be beneficial to obtain additional information from 1843(a)(2) in the future and possibly arrange a more convenient time to meet with him outside of his work environment.

Conclusion of Utah Trip

While we continue to make strong headway into the Uintah Basin, we are barely scratching the surface. We continue to develop relationships with previously interviewed residents in conjunction with meeting and interviewing new and additional witnesses.

Gaining access to Uintah tribal members and learning of their heritage and spiritual beliefs remains a focus of this investigation. This

knowledge must be gathered while maintaining the highest level of respect for the tribal members and Native American culture.

1843(a)(2) and his family will be a valuable asset into gaining not only additional information regarding our investigation, but due to their family connection and being directly related to 1843(a)(2) who has been an area resident for nearly 80 years. Several 1843 (a)(2) family members have reported witnessing this unknown creature.

1843(a)(2) could quite possibly be the most important witness / advisor to this investigation. The level of respect possessed by 1843(a)(2) amongst the tribal members will prove to be invaluable in our investigation. 1843(a)(2) has proven to have a wide breadth of knowledge and due to his standing as a 1843(a)(2) will hopefully allow gaining a better understanding of the Uintah Tribal religious / spiritual beliefs. 1843(a)(2) is willing to educate us in our endeavor into understanding their spiritual beliefs and access to 1843(a)(2) should be strictly limited due to the very sensitive nature of our conversations.

1843(a)(2) will also prove to be a valuable asset during our continued investigation 1843(a)(2) who has lived in the area for nearly all her life, is well known and appears to be respected within members of the community.

While the urge to push forward and open additional doors of opportunity for this investigation is strong, the sensitivity of the subject matter in relation to the area must be taken into consideration. Through due diligence and displaying and maintaining a non-confrontational / non-adversarial attitude has not only allowed us to get where we are currently, will allow us to continue to make positive steps forward into gaining a greater understanding into the source of this unknown entity.

(c)Status of Experiments on Utah Ranch

Plant Germination Experiment for Utah Ranch

There are multiple reports in the peer reviewed literature that pertain to effects of magnetic fields and electromagnetic radiation of different frequencies on germination of seeds (multiple plant species). BAASS scientific staff has initiated several series of plant germination experiments in order to test the hypothesis that environmental factors on the Utah ranch may have an effect on

seed growth, viability and/or germination. Below is one example of an experimental design whereby seed storage, germination and, when controlled temperature/humidity chambers are available, growth, is compared between Las Vegas and Utah.

Experimental Setup:

Utah Ranch

A. Expose seeds dry

1. Petri dish with 10 seeds
   i. Four different seed types
   ii. Two dishes per seed type
   iii. Place seeds on dry paper in petri dish in petri dish
   iv. Expose for two weeks

BAASS

A. Expose seeds dry

1. Petri dish with 10 seeds
   i. Four different seed types
   ii. Two dishes per seed type
   iii. Place seeds on dry paper
   iii. Expose for two weeks

Germinate one set at ranch (see protocol below), and bring the other set back to BAASS for germinating

B. Expose seeds during germination

Utah Ranch

1. Petri dish with 10 seeds
   i. Four different seed types (see below)
   ii. Two dishes per seed type per location
   iii. Soak seeds and place on moistened paper
   iv. Place in warm lighted location
   v. Monitor daily for germination

BAASS

1. Petri dish with 10 seeds
   i. Four different seed types (see below)
   ii. Two dishes per seed type
   iii. Soak seeds and place on moistened paper
   iv. Place in warm lighted location
   v. Monitor daily for germination

Seed types to be used:

1. Sweet Corn
2. Lima Bean
3. Sugar Snap Pea
4. Garden Bean

Other optional seeds:

1. Stringless green beans
2. Early peas
3. Broccoli
4. Radish

Seed Germination Protocol

1. Soak seeds in water for 30 minutes. This allows seeds to absorb water allowing for faster germination.
2. Place three sheets of paper in petri dishes and add enough water to moisten paper.
3. Place 10 seeds of each seed type onto paper to maintain adequate spacing. See Figure 2 for pattern of seed placement. Set up two petri dishes per seed type per location. Choose a location with high activity and an area of low activity.
4. Place petri dishes on a table that is out of the flow of general traffic. See Figure 1 for setup.
5. Depending on humidity levels, add water as needed. **Do not allow paper to dry out.**
6. Try to maintain a consistent temperature, as close to 70 degrees as possible.
7. Check seeds for germination twice a day, once in the morning and once at night. See Figure 3 for pictures of actual seed germination.
8. Take close up photographs of seeds during examinations. **Make sure seeds/seedlings are visible on photos.** Use attached sheet for recording seed germination.
9. Run experiment for full deployment or until seedlings become too big for petri dishes, whichever occurs first.

Additional measurements and observations:

1. Note if any seedlings die off
2. Bring germinated seeds back to BAASS following deployment.

Figure 1. Sample setup of petri dishes plus seeds (Wet and dry exposures). Setup two complete sets – one in area of high activity and one in low activity area.

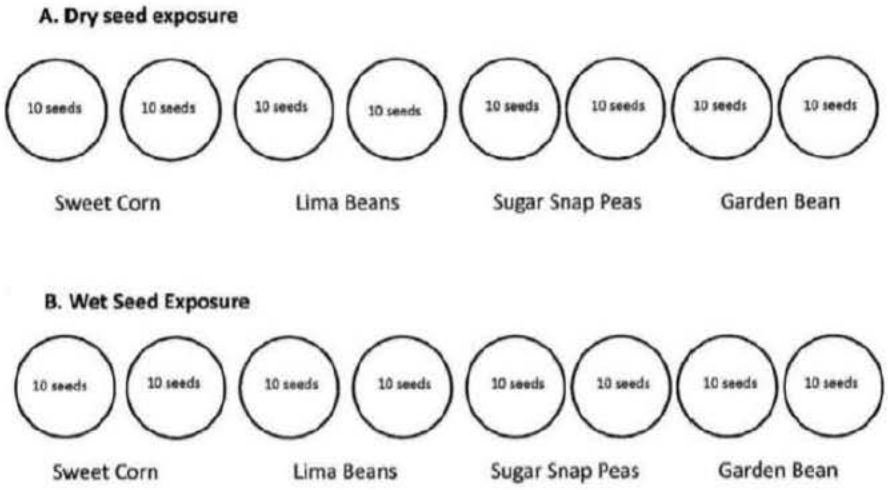

Figure 2. Pattern of seed placement in petri dishes.

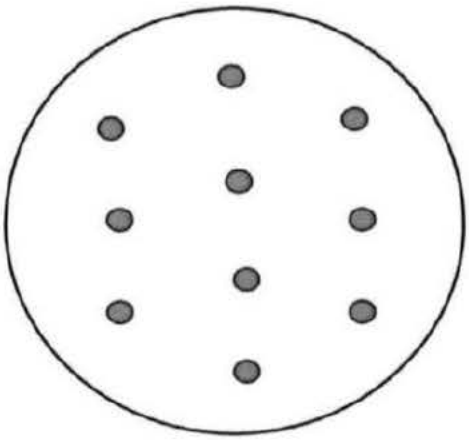

Figure 3. Pictures demonstrating seed germination of seed types used.

Corn seedlings

Tamper-Proof Games Located on the Ranch

There are numerous anecdotal reports from the security officers (see previous section—reports from security officers) of the unexplained movement, translocation, inversion or disturbance of penny coins that have been left at various locations inside and outside the double wide trailer on the Utah ranch. However, all of these anecdotal reports suffer from the obvious criticisms that they can be easily explained by (a) fraud perpetrated by the officers, (b) trespassers, (c) animals etc. In short these reports are difficult to interpret.

Therefore, BAASS has devised a series of experiments for the Utah ranch that are assembled in Las Vegas, photographed, locked in briefcases and secured at BAASS and then transported to the Utah ranch. The keys to the briefcases remain in Las Vegas. An example of one series is shown below.

All of the "brain teaser" games require a modicum of effort, analysis and intelligence to assemble and cannot be assembled (or disassembled) randomly. The locked briefcases containing the games are then positioned in a "hotspot" on the ranch for a month. The briefcase is then returned to Las Vegas and opened and the contents examined for any differences.

Puzzles Requiring Intelligence to Complete

The following experiment assumes a low level of mathematical know-how on the part of any phenomenon on the Utah Ranch: briefly, a series of dark colored tiles are arranged (glued) to the graph paper in a locked, tamper proof light box as a Fibonacci series (01,1,2,3,5,8,13,21,34,55.....) and the challenge for any intelligence on the ranch is to assemble the next number of tiles in the Fibonacci series (see photograph below). The boxes are locked shut with padlocks with keys being kept in as Vegas. The Fibonacci boxes are stationed in both Homestead #2 and in the doublewide trailer.

(d) 1843(a)(2)

BAASS began monitoring the website 1843(a)(2) in late summer 2009 since it appeared to contain several items of interest including a discussion forum that appeared to reveal many "facts" about BAASS activities and some personnel. In November BAASS investigator AAP Person 34 compiled the following report.

Date: November 12, 2009

TO: AAP Person 7 Deputy Administrator

From: AAP Person 34 Field Investigator

Subject: Skinwalker Ranch 1843(a)(2)

Dear Sir,

Over the past two months I have conducted an investigation into the posting of security information regarding the Skinwalker Ranch. I have found multiple websites and blogs referencing the Skinwalker Ranch. The 1843(a)(2) 1843(a)(2) regarding the security of the ranch is posted by 1843(a)(2)

I first found him listed as a Skinwalker Ranch guide on 1843(a)(2) 1843(a)(2) with an e-mail address of 1843(a)(2) and a telephone number of 1843(a)(2). I conducted a telephone number database search and confirmed the telephone number to 1843(a)(2) 1843(a)(2) located at the above mentioned address. I have determined that 1843(a)(2)

1843(a)(2) In late August 1843(a)(2) setup his own webpage 1843(a)(2) This is a website dedicated to the ranch 1843(a)(2) posts photographs, videos, maps/directions, a list of "Whose Involved" (You are included), news reports, a blog and a forum.

The three points of interest and concern me are the Blog, Whose Involved and the Forum.

- Blog
  - On November 3, 2009. He posted a blog "Is Ball Lightning to Blame?"

1843(a)(2) listed the blog "There have been a three star general and two other important ranking officals to the property in the past year and the story goes they saw something that frightened them and caused them to run in opposite directions."

- Whose Involved
  - AAP Person 4
  - Bigelow Aerospace with address, phone number and website.
  - Black Budget/US Military Establishment
  - AAP Person 57
  - 1843(a)(2)
  - AAP Person 7
  - NIDS with advisors, staff, address (THIS BUILDING), phone number and e-mail.
  - AAP Person 5
  - 1843(a)(2)
  - 1843(a)(2)
  - Mufon with website.
  - 1843(a)(2)

In the NIDS section he lists the parties involved and the address of the BAASS building on Polaris.

In the Mufon section he details the connection between Mufon, AAP Person 4 and BAASS.

In the EX Military Police Security Force Team section he posted a picture of the director of security at the ranch AAP Person 49 We were able to determine this photo was obtained through a Google search utilizing AAP Person 49 full name. The question is how his name was obtained.

- Forum
  - SkinwalkerRanch Events & Breaking news
    The latest paranormal discoveries and strange events.
  - Skinwalker Ranch Discussion
    Feel free to talk about anything and everything in this board.
  - Sightings, Reports & Experiences
    Reports of supernatural events from personal experiences. Support and advice will be offered.
  - Military & Black Operations at the Ranch
    Military, black ops, and contractor theories and discussions.
  - Extraterrestrial Life & The UFO Phenomenon
    Extra terrestrial vistors, ufos, and how they relate to the ranch.
  - Ghosts, Hauntings & The Paranormal
    Ghosts, graveyards, haunted places, and other local paranormal topics.
  - General Off-Topic Discussion
    General Chit-Chat on Non-Topic Subjects.

In the Skinwalker Ranch Discussion section, [redacted] lists activities of the 1843(a)(2) guards and the approximate times they patrol. He also lists the type of equipment they use.

In the Military & Black Operations at the Ranch section, [redacted] lists the 1843(a)(2) guards at the ranch as at least two active duty military security personnel on the

property whom are supervised by a ex navy seal (non/active) working with a attack K9. The seal is likely working under contractor status now (speculation) however he has professed to others that he has "orders to shoot to kill". Odd for a property managed by lowly NIDS scientists, and now supposedly in "inactive" status.

The other sections of the website are general knowledge about the ranch and the Skinwalker

Detailed Subject information

1843(a)(2)

1843(a)(2)

Subject Information:

Name	1843(a)(2)
Address	
Home	
Cell	

Wife/Girlfriend	1843(a)(2)

Bio:

8 years traveling around the United States investigating the paranormal. Bachelors of Science degree from New Mexico University. Pilot, web designer, business owner, and married father of 2. Countless close encounters with paranormal events both around Skinwalker ranch and in other regions of the US. Due to several personal encounters I've had around the ranch that have had a PROFOUND effect on me, I'm intently interested in unraveling the truth behind this very real phenomenon.

Personal Information:

1843(a)(2) has a wide variety of interests. He was a body builder who injured his back and has been taking vicodin for over four years. He has an obsession for motorcycles and paranormal activities. He has reported credit and financial problems.

Employment:

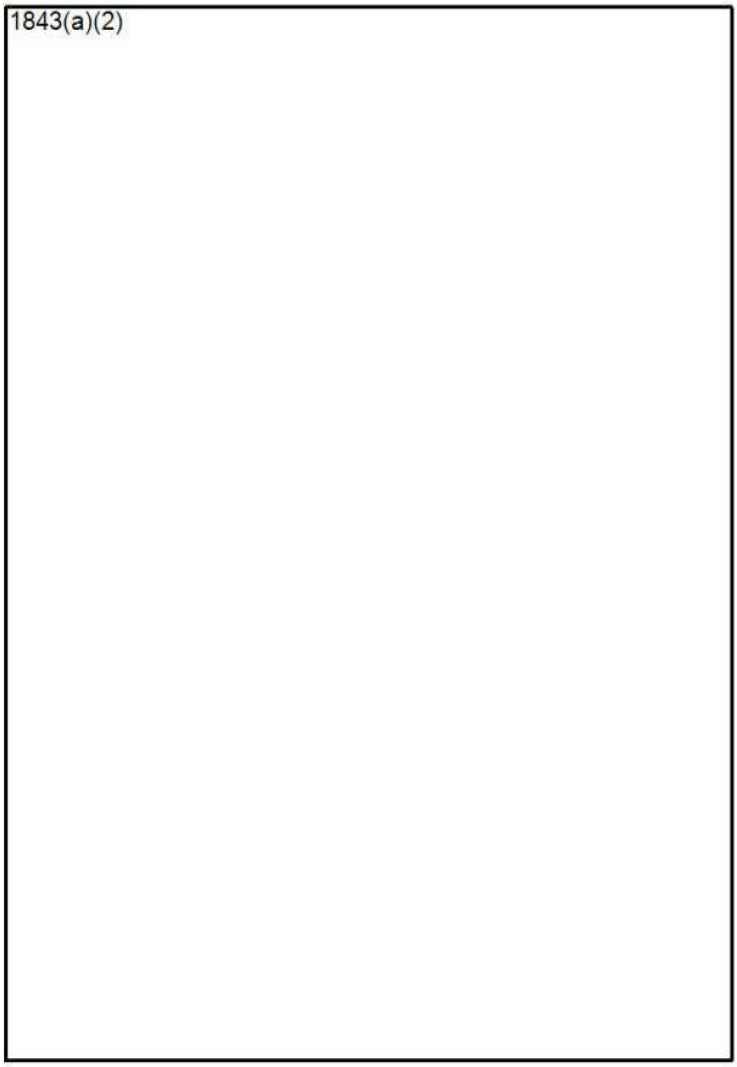

1843(a)(2)

Email addresses:

1843(a)(2)

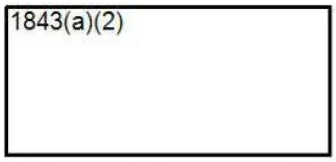

Websites:

1843(a)(2)

Youtube Postings:

1843(a)(2) has posted thirty two video clips to You Tube in the past three years. Sixteen of those are related to the Ranch. His profile information is listed below.

Channel Views: 1,816

Subscribers: 19

1843(a)(2)

Country: United States

Conclusion:

I believe 1843(a)(2) to not only be a threat to our work, but to the safety of the security and the staff at the Ranch 1843 (a)(2) has been detected by the security of the ranch on at least two occasions and had the audacity to post one of the occasions on You Tube and his webpage. 1843 (a)(2) has stated openly in his webpage and on his blogs, that he brings not only video, night vision and other unknown recording and technological devices to the Ranch, as well as unknown individuals, while conducting his surveillances/guides. He has posted a vicodin addiction and credit problems on line. Not to mention he appears to running an online mail order bride website.

In order to maintain the security and privacy of our employees as well as our work at the Ranch. I suggest a closer investigation into 1843(a)(2) and the 1843(a)(2) I believe we can facilitate this by signing up for guided trip to the Ranch hosted by the 1843(a)(2) 1843(a)(2)

Respectfully,

AAP Person 34

Field Investigator

IMPORTANT NOTE: Since AAP Person 34 submitted his report, BAASS investigators subsequently determined that the majority of the material that 1843(a)(2) 1843(a)(2) has posted has been from Internet sources and that rather than being a threat, 1843(a)(2) is merely a skilled researcher with a lot of contacts in the Roosevelt and Duchesne areas of Utah. In short, BAASS no longer considers him a threat and we believe that taking action against 1843(a)(2) would only serve to harm BAASS by dramatically increasing publicity for the 1843(a)(2) website.

Blue Orb Case: Preliminary Research Status Report

November 17, 2009

AAP Person 18

AAP Person 29

Executive Summary

On the evening of August 16, 2007, 1843(a)(2) and her 1843(a)(2) 1843(a)(2) were driving a rental car through Northern California near Davis. The time was approximately between 8:30 PM – 10:00 PM. Three blue orbs were seen erratically swirling in the distance by [ ]. One of the blue 1843(a)(2) orbs flew across the road in front of the car, while the other two entered the car as it sped along at 85 miles per hour. Of the two blue orbs that entered the car, one traveled across the dash board and exited the car. Unfortunately, the other 1843(a)(2) blue orb followed a different path through the body of [ ]. It entered her left shoulder, navigated through her upper chest area in a bubble like manner, and exited her right upper arm. In that instant, a wave of nausea overtook [ ] as her 1843(a)(2) 1843(a)(2) daughter [ ] witnessed the entire event. This wave of nausea lasted the duration of the road trip. It is also important to note that 1843(a)(2) experienced a distortion of time; a stretch of the trip that would normally take a few minutes dragged on for approximately 1.5 hours. Later that night, after reaching her 1843(a)(2) destination, [ ] drifted in and out of sleep and experienced a dream unlike any other that she had previously had. In the days, weeks, and months following the 1843(a)(2) blue orb encounter, [ ] began to feel progressively worse. Within seventy-two hours, her body began to retain water. Her co-workers and family commented on the sudden shift between a healthy and fit woman to a woman who was rapidly pre-maturely aging before their eyes. After two months [ ] had gained 50 1843(a)(2)

pounds despite increasing her fitness routine and decreasing her caloric intake. A list of worrisome symptoms began to emerge including a skin rash, loss of hair, blurred vision, decrease of hearing, osteoarthritis, and an overall general feeling of being unwell. Of particular interest is that all symptoms seem to be in the path of the blue orb (Refer to Figure 1). Blood tests such as CBC and metabolic panels have revealed puzzling results. [redacted] has had MRIs, bone scans, X-rays, and CT-scans; all of which cannot pinpoint a diagnosis for this wide range of symptoms. In early 2009, [redacted] was diagnosed with [redacted] soon after in May 2009 a [redacted] was performed. [redacted] have each been interviewed over the telephone as well as an in depth face to face interview with [redacted] The main question in this case is whether or not the blue orb incident is the cause all of this sickness. Blood tests show a clear line of abnormal results after the date of August 16, 2007. [redacted] has stated that the blue orb left a trail of severe physical damage in her body and she just wants to "get well".

1843(a)(2)

Location Overview and Weather Conditions

- Northern California, north of Davis, general location between Woodland and Knight's Landing on County Road 102.

Figure 1. Map indicating location of incident. The location of the incident is within the oval circle on the map.

Table 2. Weather conditions at the time of the incident.

Time (PDT)	Temp (F)	Dew Point	Humidity	Barometric Pressure	Visibility	Wind Dir	Wind Speed	Precip	Conditions
7:53	**81.0** °F	**48.9** °F	33%	**29.75** in	**10.0** miles	South	**11.5** mph	None	Clear
8:53	**75.9** °F	**50.0** °F	40%	**29.76** in	**10.0** miles	SSW	**11.5** mph	None	Clear
9:53	**71.1** °F	**51.1** °F	49%	**29.77** in	**10.0** miles	South	**10.4** mph	None	Clear

Weather conditions are obtained from Sacramento International Airport which is located approximately 8-10 miles southeast of the incident location. Times are PM and are for PDT.

Initial Contact and Correspondence

1843(a)(2) [ ] searched the internet for a scientist who might have knowledge of blue orbs and their subsequent effects on a human. She was extremely hesitant in 1843(a)(2) making the initial contact and wanted her situation to remain confidential. [ ] internet search uncovered a man by the name of [AAP Person 126] The initial email to [AAP Person 126] contained a brief synopsis of the event as well as a description of the physical ailments and symptoms that [ ] had been suffering 1843(a)(2) from since the incident. Indication was also given that she had begun seeking medical treatment for her declining health. [AAP Person 126] forwarded this email on to [AAP Person 8]

On May 4, 2009 [AAP Person 8] received the forwarded email. After receiving this email, he sent an email to [ ] to introduce himself. The email 1843(a)(2) 1843(a)(2) exchange began with [ ] proceeding with extreme caution as she reiterated her 1843(a)(2) experience. [ ] also informed [AAP Person 8] that she was scheduled for a [1843(a)(2)] on the morning of May 6, 2009. [AAP Person 8] inquired if he could share her experience with a few colleagues; [ ] agreed.

1843(a)(2)

Following 1843(a)(2) she and AAP Person 8 kept in contact through email. Since 1843(a)(2) had experienced 1843(a)(2) there was difficulty at first in setting up a telephone interview. Finally, on June 3, 2009 1843(a)(2) and AAP Person 8 1843(a)(2) spoke on the telephone. 1843(a)(2) was not feeling well during the phone conversation. Again, she reiterated her experience, which repeated what had been written in previous emails. A new piece of information that came from this telephone call was how the blue orb felt like a bubble as it passed through 1843(a)(2) body. At this time she also discussed her facial rash and having a biopsy done. To conclude the telephone interview, 1843(a)(2) stated that she would begin collecting her medical records and mail them to AAP Person 8 She explained that during the time that she began to visit doctors she was in the process of relocating from 1843(a)(2). A lengthy process to secure health insurance and medical care followed, which is an explanation for the delay between documented doctors visits and the date of the incident with onset of symptoms.

A certified mail envelop was received by AAP Person 8 on July 15, 2009. 1843(a)(2) He requested 1843(a)(2) permission to share her medical records with BAASS. 1843(a)(2) agreed to this and stated that she would forward any additional medical records.

Interview Summaries

Phone Interview - AAP Person 7 and 1843(a)(2)

At 11:00 AM on 08/26/2009, AAP Person 7 called 1843(a)(2) in order to introduce himself and arrange a date for a face to face meeting. Below is a summary of the telephone conversation.

1843(a)(2) was driving in a car with her son when AAP Person 7 called. 1843(a)(2) answered all of the questions in an articulate, soft spoken manner. Although 1843(a)(2) appeared stressed, she did not appear to be overly emotional as she related the details of the incident.

The following are the details that emerged from the conversation:

- 1843(a)(2) has two Masters Degrees in psychology, one of which is in clinical psychology. She has only to complete her dissertation to receive a PhD in psychology.
- The incident happened near Davis California between I-80 and Highway 99 on the night of August 16, 2007 while 1843(a)(2) was driving a rental car from Las Vegas to visit her sister in 1843(a)(2). Since it was a long trip, and 1843(a)(2) was trying to arrive at her sister's house at a reasonable hour, she was traveling fast at 85 MPH. In response to AAP Person 7 questioning on the purpose of the high speed of driving, she replied that she routinely drives at this speed when travelling long distances. 1843(a)(2) said the road was deserted when the incident happened.
- 1843(a)(2) daughter, 1843(a)(2) was in the passenger seat with the seat back in the reclined position. 1843(a)(2) was talking with 1843(a)(2) when she noticed a horrified/shocked/mortified look on her daughter's face. Simultaneously she felt something enter the left side of her body at about shoulder height,

move slowly through her upper body, and exit through her right side. As this was happening, [redacted] thought something bizarre was occurring, everything seemed to become blurred and hazy. She recalls being fixated on the expression on [redacted] face. [redacted] looked up in time to see a bright blue ball moving away from her car at a distance of about 100 feet. She judged it to be about the size of a softball, clearly shaped like a sphere, with sharp outlines.

- When [redacted] asked her daughter what had just happened, her daughter related to her that she had notice three blue balls in the distance swirling around each other as they flew towards the car. One came into the car and entered [redacted] body before passing in front of [redacted] and exiting the vehicle. The second also entered the car and moved across the dashboard before exiting the vehicle.
- From [redacted] point of view, the two blue balls that entered the car were slightly different shades of blue, one darker than the other.
- [redacted] said that the incident was so bizarre and sudden that she does not recall whether the windows of the car were up or down.
- Instantly [redacted] felt extremely ill (nausea and general malaise) and very scared; too scare to stop driving.
- Something strange occurred with the time; a 45 minute segment of the trip took three hours. Both she and her daughter have only a hazy memory of the actual time or details immediately following the incident.
- [redacted] arrived at her sister's house and because she was attending an [redacted] in the morning, she went straight to bed. While asleep [redacted] had a very unusual and vivid dream. She recalled an unusual face saying to her "Okay, we are going to fix this" while a finger behind the face applied pressure on her left shoulder.
- Four hours later [redacted] awoke feeling very refreshed and rejuvenated. She attended the clinical psychology conference. Shortly after [redacted]

ended, 1843(a)(2) 1843(a)(2)

- In the days following the conference 1843(a)(2) began to feel progressively unwell and quickly began to gain weight.
- 1843(a)(2) has always worked out once per day and been a careful eater. In spite of this healthy regimen, she began to gain weight rapidly while feeling increasingly unwell. In response to the weight gain, she hired a personal trainer and began focusing on the gym. She totally cut out sugar from her diet, but still the weight gain continued to 180 pounds. Before the incident she weighed 125 pounds. Therefore, she initiated a set of doctor's visits culminating in her 1843(a)(2) . A 1843(a)(2) 1843(a)(2) quickly followed. She was also diagnosed with 1843(a)(2) (the location that the blue orb had entered her body). Her shoulder is painful and as a daily swimmer she experiences extreme pain while swimming.
- 1843(a)(2) At the time of the incident, had about thirty clinical psychology patients who she counseled through one hour appointments. Within a couple of weeks following the incident, her patients began to tell her that she looked unwell, that she was changing. At the same time, her family became increasingly alarmed that this healthy, vibrant, successful woman had suddenly begun to go downhill and prematurely age.
- She stated that the "blue orb" left a trail of severe physical damage in her body and she just wants to "get well". Her daughter has reported no physical symptoms.
- AAP Person 7 asked her if she was available to meet with himself and AAP Person 81 AAP Person 81 anytime during the week of September 14 – 18. She said she would look in to the situation. also gave AAP Person 7 her daughter telephone number.

1843(a)(2)

1843(a)(2)

Phone Interview - AAP Person 7 and 1843(a)(2)

1843(a)(2)

At 3:00PM on 08/28/2009 AAP Person 7 and [ ] spoke on the telephone. The following are the details that emerged from the conversation:

- 1843(a)(2) was travelling with her mother in Northern California. They were on their way to stay at her Aunt's house. She agreed that the approximate date of the incident was August 16, 2007.
- Since she is not familiar with Northern California; she cannot confirm the exact location of the incident.

1843(a)(2)

- [ ] was becoming concerned because for some reason they were late and were expected at her aunt's house at 6:30PM but yet it was already dark.

1843(a)(2)

When [ ] turned to talk to her mother to express the concern that they were way behind schedule, she saw three "brilliant laser blue flying lights chasing each other" in a deserted field by the road. The balls were flying erratically at high speed around each other in a very strange way.

1843(a)(2)

- When [ ] first saw them, she thought the objects were several hundred yards away, maybe even half of a mile. Their car was travelling through a particularly deserted area with no houses around and no other cars on the road.
- Suddenly the blue objects began racing towards the car. She described two bigger balls of light (softball size) and one baseball sized ball of light. One of the three balls flew right across the road in front of the rental car. The other two came into the car. The smaller ball went right through her Mother. The other larger, softball sized ball flew right over the dashboard. Both exited the right-hand side of the car. The episode was over in less than a second.
- Neither of the objects touched her as they passed through the car. The smaller blue ball emerged from her mother's arm (at just above bicep level) and instantly was gone out the other side of the car.

1843(a)(2)

- was certain that the car windows had been closed and the car radio had not been playing.

1843(a)(2)

- Immediately following the event, was motivated to discuss the incident since she was frightened. Her Mother did not want to talk about it and wanted to drive out of the area as fast as possible. called her aunt to tell her they were on the way and to not be concerned. 1843(a)(2)

1843(a)(2)

- said she had no short or long term effects, but hastened to add that neither of the objects had touched her. She expressed concern about her mother's health.
- Overall, she felt that the incident had been accidental. If they had not been travelling in the car in that particular location, then the blue objects would have simply passed over the road. They were in the wrong place at the wrong time.

Face to Face Interview – AAP Person 7, AAP Person 81, 1843(a)(2)

1843(a)(2) On September 16, 2009 AAP Person 7 and AAP Person 81 met in

1843(a)(2) person with and her son Below is a summary of the key points from the discussion:

1843(a)(2)

- AAP Person 81 introduced both himself and AAP Person 7 to

1843(a)(2) and He gave a brief overview of the discussion ahead.

- The first point of interest was attempting to pinpoint the location of the incident (see the section entitled Location Overview). The mother and daughter were traveling from Las Vegas to the San Francisco area. 1843(a)(2) discussed how she was exiting I-80 from Richardson Avenue at approximately 8:30PM. They were travelling toward Highway 99 and had

just crossed over I-5. The incident occurred just after crossing over I-5, around a street called Pollard.

- Momentarily after the incident occurred, [redacted] glanced at the clock and saw that it read 10:45 PM. [redacted] discussed how time was distorted and how the trip seemed to be taking longer than expected. Finally they arrived at [redacted] at approximately 11:30 PM.
- [redacted] discussed the sequence of events that unfolded during the incident. The evening was completely dark. They were traveling on a road with no other cars in sight. [redacted] felt the blue orb pass through her body and instantly felt unwell. [redacted] witnessed the blue orb passing through her mother's body. During the remainder of the car trip, whenever [redacted] attempted to discuss the incident with [redacted] a feeling of nausea would overcome [redacted]
- [redacted] witnessed three blue orbs and [redacted] witnessed one blue orb. Since [redacted] was reclined, she was not hit by the blue orb. (See the phone interview with [redacted]
- [redacted] described the path of the blue orb through her body; it entered through her left upper arm and exited the right. She said that it felt as if the blue orb did not go through her body in a straight line, rather as if it was negotiating and changing direction slightly as it navigated through the tissue.
- The feeling of nausea subsided that evening, but [redacted] still felt "a little off balance".
- [redacted] spoke of the dream that she had had the night of the incident while staying with her sister. She dreamt of a finger and a face telling her that the situation would be fixed. With the dream initially came a feeling of fear followed by relief. She cannot recall the features of the face. [redacted] then fell in to a deep sleep and awoke the next morning feeling rested.
- [redacted] then went to the [redacted] By then end of the [redacted] she was exhausted and not feeling herself.
- Within 72 hours of the incident, not only was she still not feeling well, but she had developed [redacted]

1843(a)(2)

AAP Person 81

1843(a)(2)

AAP Person 81 described the 1843(a)(2)

- 1843(a)(2)

- The conversation then turned to weight gain. She described her healthy diet, exercise plan, vitamin intake and emphasized the fact that she continued to gain weight. AAP Person 81 questioned on the area of weight gain and swelling. Together they determined that weight gain may have been due to a fluid and electrolyte imbalance. An important fact is that the water retention began shortly after the incident; within five days.

1843(a)(2)

1843(a)(2)

1843(a)(2)

- moved to California in January 2008, where she had a 1843(a)(2)

1843(a)(2)

- AAP Person 81 began discussing the laboratory results from blood. See the Medical Records Summary section. He then began to formulate a medical plan which would involve a full metabolic and cardio screen, a full endocrine screen, a full allergic reaction screen, a B-12 screen, CBC, an autoimmune panel, and a spinal MRI.

1843(a)(2)

1843(a)(2)

- stated that she took no medications before the encounter and has had no history of sleep disorder.

1843(a)(2)

- blood work has not thus far revealed any endocrine system malfunctions.

- 1843(a)(2)

- 1843(a)(2)

- AAP Person 81 also speculated that her 1843(a)(2)
  1843(a)(2)

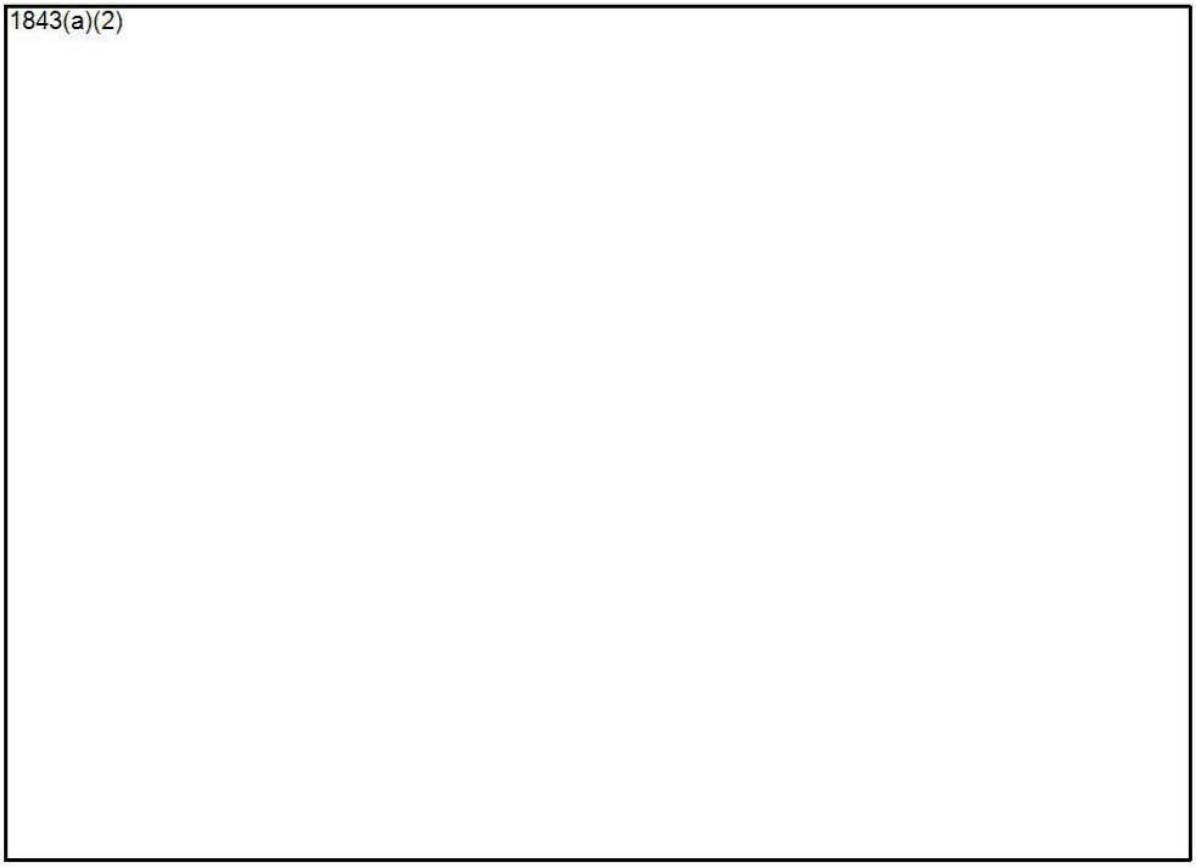

1843(a)(2) • stated that her patients and family have been commenting on how premature aging has set in following the incident. Note, she has never smoked, done drugs or drank alcohol.

- The conversation wrapped up with AAP Person 81 asking what 1843(a)(2)
1843(a)(2) she thought happened. responded by stating that she is unsure, all that she knows is that she felt something go through her, which her daughter witnessed. She is looking to AAP Person 81 and AAP Person 7 to add some guidance and insight into what happened when she encountered the blue orb.

1843(a)(2) **Physical Symptoms**

Immediately following the incident on 8/16/2007, experienced a feeling of 1843(a)(2)
sickness (nausea and general malaise). Her general health began to degrade rapidly:

1843(a)(2)

Path of the Blue Orb

1843(a)(2)

Refer to Figure 1 below for a depiction of the path of the blue orb through

1843(a)(2) body. stated that the blue orb entered her left shoulder, navigated through her tissue and then exited her right upper arm area. As physical 1843(a)(2)

symptoms, in the preceding section, are compared to the orb entry and exit sites, a direct path of physical symptoms becomes apparent beginning with 1843(a)(2)

1843(a)(2)

The blue shaded area represents the area of impact.

Conclusion

Many of the important BAASS projects, including Northern Tier, entry into classified archives, Project Oral History, as well as contacting key people in the military and private sector are on hold because BAASS currently does not have the Need to Know for this information. BAASS in collaboration with the sponsor has recently taken tentative steps to contact some organizations within the USG that may have access to material and archives. These contacts are at much too a preliminary stage to assess the likelihood of their success or failure.

In spite of the above impediments, significant progress has been made in training and initially deploying BAASS field investigative teams during the fall 2009 months. A large part of the current investigations at BAASS are focused on the Utah ranch and surrounding areas. The BAASS MUFON relationship is being closely monitored especially since the case numbers that MUFON are alerting BAASS with, although improving, are still lower than originally expected. The BAASS database of cases is now larger than any other database owned by UAP organizations in North America. It should be noted that BAASS has initiated a separate Capella database for the events on the Utah ranch and surrounding areas, a report on which will be forthcoming in the coming months.
